COMMON MODIFICATIONS

1 Scope

Replacement

This clause of Part 1 is replaced by the following.

This European Standard deals with the safety of electrical appliances for heating liquids for household and similar purposes, their **rated voltage** being not more than 250 V.

NOTE Z101 Some appliances may be used for heating food.

NOTE Z102 Examples of appliances that are within the scope of this standard are

- coffee-makers,
- cooking pans,
- egg boilers,
- feeding-bottle heaters,
- kettles and other appliances for boiling water, having a rated capacity not exceeding 10 l,
- milk heaters,
- pressure cookers having a rated cooking pressure not exceeding 140 kPa and a rated capacity not exceeding 10 l,
- rice cookers,
- slow cookers,
- steam cookers,
- soy milk makers,
- tea makers,
- wash boilers,
- yoghurt makers.

Appliances intended to be used by laymen in shops and other premises for normal housekeeping purposes, are within the scope of this standard.

NOTE Z103 Examples of such appliances are

- glue pots with a water jacket,
- livestock feed boilers,
- sterilizers.

If the appliance is intended to be used professionally to process food for commercial consumption, that appliance is not considered to be for household or similar use only.

NOTE Z104 Examples of appliance for household environment are appliances for typical housekeeping functions used in the household environment that may also be used by non expert users for typical housekeeping functions:

- in shops and other similar working environments;
- in farm houses;
- by clients in hotels, motels and other residential type environments;
- in bed and breakfast type environments.

NOTE Z105 Household environments include the dwelling and its associated buildings, the garden, etc.

As far as is practicable, this standard deals with the common hazards presented by appliances that are encountered by all persons in household and similar environments.

However, in general, it does not take into account children playing with appliances and their use by very young children.

It does not take into account the **use** of the following appliances by **children**:

- pressure cookers;
- glue pots with a water jacket;
- livestock feed boilers;
- sterilizers;
- soy milk makers;
- wash boilers.

It does not take into account the use of the following appliances by young children without supervision:

- cooking pans;
- slow cookers;
- steam cookers:
- tea makers;
- rice cookers;
- coffee makers:
- kettles;
- egg boilers;
- milk heaters.

NOTE Z106 Feeding bottle heaters and yoghurt makers may be used by young children.

It is recognized that **very vulnerable people** may have needs beyond the level addressed in this standard.

NOTE Z107 Attention is drawn to the fact that

- for appliances intended to be used in vehicles or on board ships or aircraft, additional requirements may be necessary,
- in many countries, additional requirements are specified by the national health authorities, the national authorities responsible for the protection of labour, the national water supply authorities and similar authorities.

NOTE Z108 This standard does not apply to

- frying pans and deep fat fryers (EN 60335-2-13),
- storage water heaters (EN 60335-2-21),
- instantaneous water heaters (EN 60335-2-35),
- surface-cleaning appliances employing liquids or steam (EN 60335-2-54),
- portable immersion heaters (EN 60335-2-74),
- commercial dispensing appliances and vending machines (EN 60335-2-75),
- appliances for medical purposes (EN 60601),
- appliances intended exclusively for industrial purposes,
- appliances intended to be used in locations where special conditions prevail, such as the presence of a corrosive or explosive atmosphere (dust, vapour or gas),
- appliances for high-frequency heating,
- pressure sterilizers,
- humidifiers for household and similar use (EN 60335-2-98).

NOTE Z109 Attention is drawn to the fact that in many countries requirements for pressure vessels are applied to pressure cookers.

7 Marking and instructions

This clause of Part 1 is applicable except as follows:

7.1 Add the following:

When the provisions of footnote b to Table Z101 apply, the appliance shall be marked with

- the substance of "CAUTION: Hot surface", or
- symbol IEC 60417-5041.

The warning shall be put on the surface of the appliance having the highest temperature and shall be visible during normal use.

7.6 Add the following::

[symbol IEC 60417-5041]

Caution, hot surface

7.10 Replace the text beginning by "Devices used to start/stop operational..." and ending in the paragraph starting with "An ON/OFF switch, if any,..." included NOTE Z1 and NOTE Z2 by the following:

The accessible switch required by 22.40 shall be distinguished from other manual devices by means of shape, or size, or surface texture, or position, etc.

An indication that the device has been operated shall be given by:

- a tactile feedback, or
- an audible and visual feedback.

NOTE Z1 The sound of the motor or sound of an actuator switching ON/OFF is regarded as audible feedback. The stopping of the typical function (e.g. stopping of the vibration on the body of the appliance or of a part of it) is regarded as tactile means.

NOTE Z2 Devices used to start/stop operational functions mean devices that are operated by the user to start/stop the intended function of the appliance.

A selector switch with an off-position clearly identifiable is allowed.

An ON/OFF switch, if any, is considered a suitable device to stop operational functions. A plug is not considered a suitable device to stop operational functions, as it can be difficult to be reached by vulnerable persons.

7.12 Replace the third and fourth paragraph of Part 1 with the following:

The instructions for pressure cookers, glue pots with a water jacket, livestock feed boilers, sterilizers, soy milk makers, wash boilers shall include the substance of the following:

This appliance shall not be used by children. Keep the appliance and its cord out of reach of children.
