EESTI STANDARDI EESSÖNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 1500:1999 sisaldb Euroopa standardi EN 1500:1997 ingliskeelset teksti.	This Estonian standard EVS-EN 1500:1999 consists of the English text of the European standard EN 1500:1997.
Käesolev dokument on jõustatud 23.11.1999 ja selle kohta on avaldatud teade Eesti standardiorganisatsiooni ametlikus väljaandes.	This document is endorsed on 23.11.1999 with the notification being published in the official publication of the Estonian national standardisation organisation.
Standard on kätesaadav Eesti standardiorganisatsioonist.	The standard is available from Estonian standardisation organisation.

Käsitlusala: Käesolev standard esitab tegelikke tingimusi simuleeriva testimismeetodi, kasutades selleks käte desinfitseerimise lahust vabatahtlikel kunstlikult saastatud kätele hõõrumiseks, et tuvastada, kas hügieeniline käte desinfitseerimise lahus vähendab transitoorse floora laialikandumist vastavalt nõuetele. English version

Chemical disinfectants and antiseptics – Hygienic handrub

Test method and requirements (phase 2/step 2)

Antiseptiques et désinfectants chimiques – Traitement hygiénique des mains par friction – Méthode d'essai et prescriptions (phase 2/étape 2)

Chemische Desinfektionsmittel und Antiseptika – Hygienische Händedesinfektion – Prüfverfahren und Anforderungen (Phase 2/Stufe 2)

This European Standard was approved by CEN on 1997-06-29.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Foreword

This European Standard has been prepared by the Technical Committee CEN/TC 216 "Chemical disinfectants and antiseptics" the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 1998, and conflicting national standards shall be withdrawn at the latest by January 1998.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Annex A is normative. Annexes B, C, D and E are informative.

NOTE : Attention is drawn to the fact that tests on human volunteers are the subject of legal provisions in certain European countries/regions.

1 Scope

This European Standard specifies a method of test simulating practical conditions for establishing whether a product for hygienic handrub reduces the release of transient flora according to the requirements when rubbed onto the artificially contaminated hands of volunteers.

This European Standard applies to products for hygienic handrub for use in areas and situations where disinfection is medically indicated. Such indications occur in patient care, for example :

- in hospitals, in community medical facilities and in dental institutions ;
- in clinics of schools, of kindergartens and of nursing homes.

and may occur in the workplace and in the home. It may also include services such as laundries and kitchens supplying products directly for the patient.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

prEN 12054 Chemical disinfectants and antiseptics – Products for hygienic and surgical handrub and handwash – Bactericidal activity – Test method and requirements (phase 2/step 1)

3 Definitions

For the purposes of this standard, the following definitions apply :

3.1 product (for chemical disinfection and/or antisepsis)

Chemical agent or formulation used as a chemical disinfectant and/or antiseptic [EN 1040].

3.2 hygienic handrub

Postcontamination treatment procedure that involves rubbing hands without the addition of water, using a bactericidal preparation directed against transient microorganisms to prevent their transmission regardless of the resident skin flora.

3.3 prevalue

Number of colony forming units (cfu) sampled from hands before treatment.
