English Version

Leather - Sampling - Number of items for a gross sample (ISO
2588:2014)

Cuir - Échantillonnage - Nombre d'unités élémentaires de
l'échantillon global (ISO 2588:2014)

Leder - Probenentnahme - Anzahl der Einzelstücke für eine
Gesamprobe (ISO 2588:2014)

This European Standard was approved by CEN on 4 July 2014.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword

This document (EN ISO 2588:2014) has been prepared by IULTCS "International Union of Leather Technologists and Chemists Societies" in collaboration with Technical Committee CEN/TC 289 "Leather" the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2015, and conflicting national standards shall be withdrawn at the latest by January 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 2588:2014 has been approved by CEN as EN ISO 2588:2014 without any modification.

Leather — Sampling — Number of items for a gross sample

1 Scope

This International Standard specifies a method for the drawing, from a lot, of whole pieces of leather to form a gross sample.

The method is applicable to all kinds of leather of any type of tannage.

NOTE This International Standard does not cover marking and storage of the gross sample.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3534-2, *Statistics — Vocabulary and symbols — Part 2: Applied statistics*

3 Terms and definitions

For the purposes of this document, the terms and definitions in ISO 3534-2 apply. For leather sampling, the following interpretations apply.

3.1

lot

batch

definite quantity of leather manufactured or produced under conditions which are presumed uniform

3.2

gross sample

number of items collected as a sample from a lot

3.3

item

whole piece of leather that belongs to the gross sample

4 Method of sampling

4.1 In the absence of any other agreement on a sampling procedure between the interested parties or in the test method, the procedure described in [4.2](#) and [4.3](#) is recommended.

4.2 The number of items in a gross sample depends on the size of the lot and purpose of the sampling. The number will depend on the reliability of the test results, the variation in the properties and the error inherent in the testing procedure.

4.3 The minimum number of items in a gross sample is given in [Table 1](#).
