

**Dust-pressed ceramic tiles with a water absorption of 3 % < E <= 6 %; group BIIa**

## EESTI STANDARDI EESSÕNA

## NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 177:2003 sisaldb Euroopa standardi EN 177:1991 ingliskeelset teksti.	This Estonian standard EVS-EN 177:2003 consists of the English text of the European standard EN 177:1991.
Standard on kinnitatud Eesti Standardikeskuse 06.06.2003 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.	This standard is ratified with the order of Estonian Centre for Standardisation dated 06.06.2003 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.
Standard on kätesaadav Eesti standardiorganisatsioonist.	The standard is available from Estonian standardisation organisation.

EUROPEAN STANDARD

EN 177:1991

NORME EUROPEENNE

EUROPAISCHE NORM

September 1991

UDC 691.43:413-033.64

Supersedes EN 177:198

Description: Tiles, coating slabs, water absorption tests,  
equipment specifications, shape, dimensions,  
dimensional tolerance, appearance, physical  
properties, mechanical properties, chemical  
properties, marking

English version

Dust-pressed ceramic tiles with a water absorption  
of  $3\% \leq E \leq 6\%$  (Group BIIa)

Carreaux et dalles céramiques pressées à sec à absorption d'eau  $3\% \leq E \leq 6\%$  (Groupe BIIa) Trockengepreßte keramische Fliesen und Platten mit einer Wasseraufnahme von  $3\% \leq E \leq 6\%$  (Gruppe BIIa)

This European Standard was approved by CEN on 1991-09-18  
CEN members are bound to comply with the CEN/CENELEC Internal Regulations  
which stipulate the conditions for giving this European Standard the  
status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national  
standards may be obtained on application to the Central Secretariat or to  
any CEN member.

This European Standard exists in three official versions (English, French,  
German). A version in any other language made by translation under the  
responsibility of a CEN member into its own language and notified to the  
Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark,  
Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg,  
Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Europäisches Komitee für Normung

Central Secretariat: rue de Stassart 36, B-1050 Brussels

**Foreword**

This European Standard was drawn up by the Technical Committee CEN/TC 67 'Ceramic tiles', the Secretariat of which is held by UNI.

According to the common CEN/CENELEC rules, the following countries are bound to implement this European Standard:  
Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

This document is a preview generated by EVS

## 1 Scope and field of application

This European Standard specifies the sizes, dimensional tolerances, mechanical, physical and chemical requirements, surface quality requirements and marking of ceramic tiles. It is applicable only to dust-pressed ceramic tiles of first quality, including tiles premounted on sheets, with a water absorption of  $3\% < E < 6\%$  according to Group BIIa of EN 87, for interior and exterior use (see clause 7 ordering) on both floors and walls.

## 3 Description

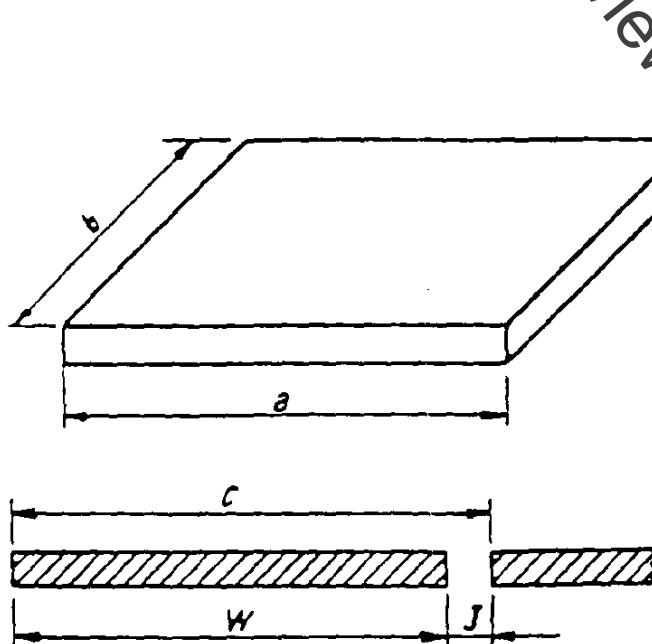

The definition of dust-pressed ceramic tiles is given in EN 87. Mosaic is a tile of any geometrical shape whose surface area is equal or less than  $90\text{ cm}^2$ . The surface of tiles and components belonging to this group can be smooth, profiled, wavy, decorated or finished in some other way. It can be unglazed (UGL), glossy, matt or semi-matt (GL).

Although tiles have a visible surface and usually a surface which is intended to be adhered and bears a back panel, they may have identical surfaces without a panel or marking.

Tiles may have spacer lugs.

## 4 Shapes and sizes

For shapes and sizes see tables 1 and 2 and figures 1 and 2.

Co-ordinating size (C) = Work size (W) + Joint width (J)  
Work size (W) = Dimensions of the visible face (a) and (b)

Figure 1. Tile
