

Dust-pressed ceramic tiles with a water absorption of 6 % < E <= 10 %; group BIIb

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 178:2003 sisaldb Euroopa standardi EN 178:1991 ingliskeelset teksti.	This Estonian standard EVS-EN 178:2003 consists of the English text of the European standard EN 178:1991.
Standard on kinnitatud Eesti Standardikeskuse 06.06.2003 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.	This standard is ratified with the order of Estonian Centre for Standardisation dated 06.06.2003 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.
Standard on kätesaadav Eesti standardiorganisatsioonist.	The standard is available from Estonian standardisation organisation.

EUROPEAN STANDARD

EN 178:1991

NORME EUROPEENNE

EUROPAISCHE NORM

September 1991

UDC 691.43:413-033.64

Supersedes EN 178:1984

Descriptors: Tiles, coating slabs, ceramic coating, Water absorption tests, equipment specifications, shape, dimensions, dimensional tolerance, appearance, physical properties, mechanical properties, chemical properties, marking

English version

Dust-pressed ceramic tiles with a water absorption of $6\% \leq E \leq 10\%$ (Group BIIb)

Carreaux et dalles céramiques pressés à sec, à absorption d'eau $6\% \leq E \leq 10\%$ (Groupe BIIb) Trockengepreßte keramische Fliesen und Platten mit einer Wasseraufnahme von $6\% \leq E \leq 10\%$ (Gruppe BIIb)

This European Standard was approved by CEN on 1991-09-18
CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat: rue de Stassart 36, B-1050 Brussels

Foreword

This European Standard was drawn up by the Technical Committee CEN/TC 67 'Ceramic tiles', the Secretariat of which is held by UNI.

According to the common CEN/CENELEC rules, the following countries are bound to implement this European Standard:
Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

This document is a preview generated by EVS

1 Scope and field of application

This European Standard specifies the sizes, dimensional tolerances, mechanical, physical and chemical requirements, surface quality requirements and marking of ceramic tiles. It is applicable only to dust-pressed ceramic tiles of first quality, including tiles premounted on sheets, with a water absorption of $6\% < E < 10\%$ according to Group BIIb of EN 87, for interior and exterior use (see clause 7 ordering) on both floors and walls.

3 Description

The definition of dust-pressed ceramic tiles is given in EN 87. Mosaic is a tile of any geometrical shape whose surface area is equal to or less than 90 cm^2 .

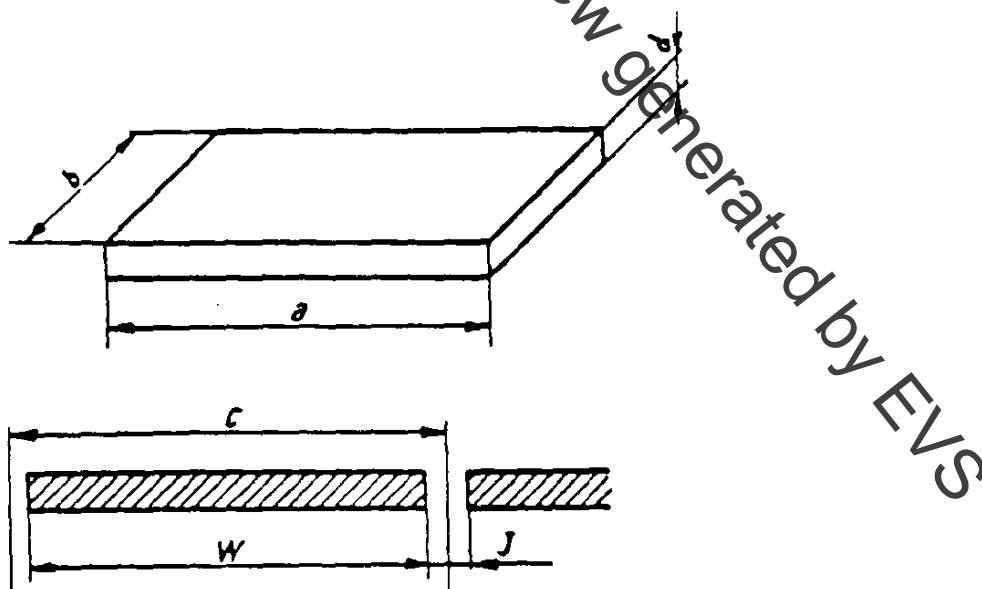

The surface of tiles and components belonging to this group can be smooth, profiled, wavy, decorated or finished in some other way. It can be unglazed (UGL), glossy, matt or semi-matt (GL).

Although tiles have visible surface and usually a surface which is intended to be adhered and bears a back panel, they may have identical surfaces without a panel or marking.

Tiles may have spacer lugs.

4 Shapes and sizes

For shapes and sizes see figures 1 and 2 and tables 1 and 2.

Co-ordinating size (C) = Work size (W) + Joint width (J)
Work size (W) = Dimensions of the visible faces (a) and (b)

Figure 1. Tile
