This European Standard was approved by the CENELEC Electronic Components Committee (CECC) on 7 February 1994. CENELEC members are bound to comply with CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the General Secretariat of the CECC or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CECC General Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and United Kingdom. The membership of the CECC is identical, with the exception of the national electrotechnical committees of Greece, Iceland and Luxembourg.

FOREWORD

The CENELEC Electronic Components Committee (CECC) is composed of those member countries of the European Committee for Electrotechnical Standardization (CENELEC) who wish to take part in a harmonized System for electronic components of assessed quality.

The object of the System is to facilitate international trade by the harmonization of the specifications and quality assessment procedures for electronic components, and by the grant of an internationally recognized Mark, or Certificate, of Conformity. The components produced under the System are thereby acceptable in all member countries without further testing.

This European Standard was prepared by CECC WG 26, Fibre Optic Connectors.

The text of the draft based on document CECC(Sec)3244 was submitted to the formal vote; together with the voting report, circulated as document CECC(Sec)3483 it was approved by CECC as EN 186 240 on 7 February 1994.

The following dates were fixed:

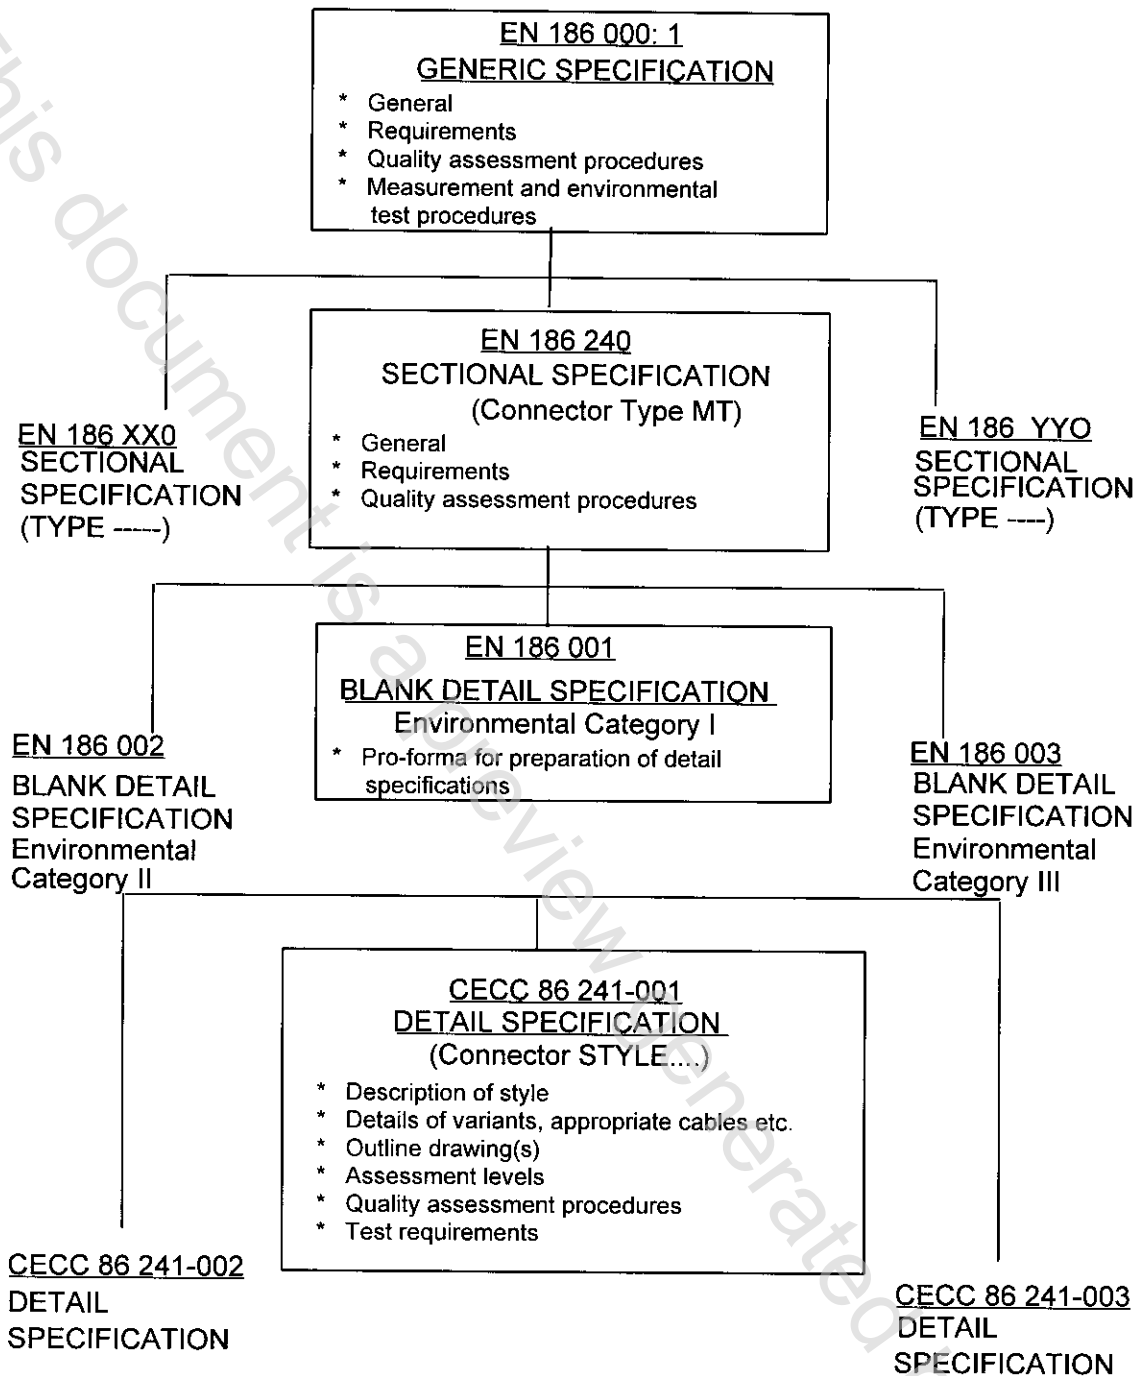

- | | | |
|---|-------|------------|
| - latest date of announcement of the EN at national level | (doa) | 1993-08-08 |
| - latest date of publication of an identical national standard* | (dop) | 1994-02-08 |
| latest date of withdrawal of conflicting national standards* | (dow) | 1995-02-08 |

* National Standard (excluding National implementation of IECQ Specifications)

Document numbering for fibre optic connector specifications follows 2.2(1) of CECC 00 700: Section IV, in order to permit the issue of more than nine sectional specifications. The approved numbering system applicable to fibre optic connector specifications is illustrated in the following diagram:

SECTION ONE - GENERAL

1. General

1.1 Scope

This specification covers Type MT fibre optic connector sets. Type MT defines a multiway connector characterised by a clamp spring coupling mechanism and a rectangular plug nominally 6,4 mm x 2,5 mm which utilises two pins of 0,7 mm diameter as its alignment technology . It is applicable to a joint of multiple fibres by arranging them between two pin-positioning holes in the plug.

The specification contains the requirements for Type MT connector sets.

Detail specifications shall be prepared using the following proforma general blank detail specifications associated with the generic specification. For example:-

Environmental
Category II
EN 186 002

When completed, the detail specifications (DSs) applicable to this sectional specification (SS) shall be re-numbered in accordance with CECC 00 700 (Section IV) Issue 1, clause 4.2, as follows:-

CECC 86 242-XXX
Type MT
Environmental
Category II

1.2 Related documents

The following standards contain provisions which, through reference in this text, constitute provisions of this standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent editions of the standards listed below.

References made to a specific clause or sub-clause of a standard include all sub-clauses to the reference unless otherwise specified.
