Aerospace series - Bushes, plain aluminium alloy with self-lubricating liner - Dimensions and loads

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 2285:2000 sisaldb Euroopa standardi EN 2285:1989 ingliskeelset teksti. Standard on kinnitatud Eesti Standardikeskuse 11.01.2000 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas. Standard on kätesaadav Eesti standardiorganisatsioonist.	This Estonian standard EVS-EN 2285:2000 consists of the English text of the European standard EN 2285:1989. This standard is ratified with the order of Estonian Centre for Standardisation dated 11.01.2000 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation. The standard is available from Estonian standardisation organisation.

Buchsen ohne Flansch
aus Aluminium-Legierung
mit selbstschmierender Beschichtung
Maße und Belastungen

This European Standard was accepted by CEN on 1988-11-03. CEN members are bound to comply with the requirements of CEN Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to CEN Central Secretariat has the same status as the official versions.

CEN members are the national standards organizations of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxemburg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat : Rue Bréderode 2, B-1000 Bruxelles

Brief history

This European Standard has been prepared by the European Association of Aerospace Manufacturers (AECMA).

After inquiries and votes carried out in accordance with the rules of this Association, this Standard has successively received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to CEN.

According to the Common CEN/CENELEC Rules, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxemburg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

1 Scope

This standard specifies the characteristics of plain bushes in aluminium alloy with self-lubricating liner and the design recommendation of shafts and housings.

2 Field of application

The bushes are intended for operation within the temperature range of -55 °C to +150 °C and assembly with an interference fit into fixed and moving aerospace parts.

3 References

- EN 2086, Aluminium alloy 2618A-T851 (Al-P11-T851) - Forged bars and slabs a \leq 150 mm - Aerospace series 1)
- EN 2101, Aerospace series - Chromic acid anodizing of aluminium and wrought aluminium alloys 1)
- EN 2284, Aerospace series - Sulphuric acid anodizing of aluminium and wrought aluminium alloys 1)
- EN 2311, Aerospace series - Bushes with self lubricating liners - Technical specification

4 Required characteristics

4.1 Configuration - Dimensions - Tolerances - Masses

Configuration : see figure 1.

Dimensions, tolerances and masses : see figure 1 and table 1.

Dimensions and tolerances apply after surface treatment.

4.2 Surface roughness

See figure 1.

4.3 Materials

Bush : Aluminium alloy EN 2086.

Liner : Self-lubricating wear resistant material consistent with the requirements of EN 2311.

4.4 Surface treatment

Chromic acid anodizing EN 2101A or
Sulphuric acid anodizing EN 2284A.

1) Published as AECMA standard.
