# Aerospace series - Requirements and test procedures for relays and contactors - Part 411: Temperature change

Aerospace series - Requirements and test procedures for relays and contactors - Part 411: Temperature change

#### EESTI STANDARDI EESSÕNA

#### **NATIONAL FOREWORD**

Käesolev Eesti standard EVS-EN 2349-411:2007 sisaldab Euroopa standardi EN 2349-411:2007 ingliskeelset teksti.	This Estonian standard EVS-EN 2349-411:2007 consists of the English text of the European standard EN 2349-411:2007.
Käesolev dokument on jõustatud 31.05.2007 ja selle kohta on avaldatud teade Eesti standardiorganisatsiooni ametlikus väljaandes.	This document is endorsed on 31.05.2007 with the notification being published in the official publication of the Estonian national standardisation organisation.

#### Käsitlusala:

This standard specifies a method for checking the capability of relays and contactors to withstand temperature change. It shall be used together with EN 2349-100.

Standard on kättesaadav Eesti

standardiorganisatsioonist.

#### Scope:

This standard specifies a method for checking the capability of relays and contactors to withstand temperature change. It shall be used together with EN 2349-100.

The standard is available from Estonian

standardisation organisation.

ICS 49.060

Võtmesõnad:

### EUROPEAN STANDARD NORME EUROPÉENNE

**EUROPÄISCHE NORM** 

EN 2349-411

April 2007

ICS 49.060

#### **English Version**

## Aerospace series - Requirements and test procedures for relays and contactors - Part 411: Temperature change

Série aérospatiale - Exigences et méthodes d'essais des relais et contacteurs - Partie 411 : Variations de température

Luft- und Raumfahrt - Anforderungen und Prüfverfahren für Relais und Schaltschütze - Teil 411: Temperaturwechsel

This European Standard was approved by CEN on 19 May 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

#### **Foreword**

This document (EN 2349-411:2007) has been prepared by the AeroSpace and Defense Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2007, and conflicting national standards shall be withdrawn at the latest by October 2007.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

#### 1 Scope

This standard specifies a method for checking the capability of relays and contactors to withstand temperature change. It shall be used together with EN 2349-100.

#### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 2349-100, Aerospace series — Requirements and test procedures for relays and contactors — Part 100: General requirements 1)

EN 2349-201, Aerospace series — Requirements and test procedures for relays and contactors — Part 201: Visual inspection

EN 2349-301, Aerospace series — Requirements and test procedures for relays and contactors — Part 301: Pick-up and drop-out voltage

EN 2349-303, Aerospace series — Requirements and test procedures for relays and contactors — Part 303: Dielectric strength

EN 2349-304, Aerospace series — Requirements and test procedures for relays and contactors — Part 304: Operate and release time

EN 2349-305, Aerospace series — Requirements and test procedures for relays and contactors — Part 305: Bounce time

EN 2349-307, Aerospace series — Requirements and test procedures for relays and contactors — Part 307: Contact voltage drop

ISO 7137:1995, Aircraft — Environmental conditions and test procedures for airborne equipment <sup>2)</sup>

#### 3 Method

#### 3.1 Mounting

The electrical connections shall be wired in accordance with the product standard

#### 3.2 Procedure

The relay or contactor shall be subjected to a temperature change test in accordance with ISO 7137.

Duration of the test: 48 h

#### 4 Requirements

Test in accordance with EN 2349-201. The relay or contactor shall show no sign of overheating or distortion.

Test in accordance with EN 2349-301, EN 2349-303, EN 2349-304, EN 2349-305 and EN 2349-307.

<sup>1)</sup> In preparation at the date of publication of this standard.

<sup>2)</sup> Endorsement of publications EUROCAE/ED-14 and RTCA/DO-160.
