2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 14847, *Aerosol containers - Tinplate containers - Dimensions of the 25,4 mm aperture*

3 Requirements for dimensions of the containers

Necked-in containers shall conform to Figure 1 and Table 1. Straight-line containers shall conform to Figure 2 and Table 2.

NOTE The shape of containers need not necessarily correspond exactly to the figures as long as the specified dimensions conform.

It is recommended that aerosol containers be designated by:

- 1) their nominal brimful capacity (C_2), in millilitres;
- 2) their characteristic diameters, in millimetres;
- 3) their characteristic height (H_1), in millimetres.

In addition, the nominal diameters of the top and bottom ends for necked-in containers should be included in the designation.

EXAMPLES

straight-sided cans:

$C_2/D/H_1$;

necked-in cans with different top and bottom diameters: $C_2/D/D_{N1}/D_{N2}/H_1$.
