R 467

PREFERRED MODULES AND DIAMETRAL PITCHES OF CYLINDRICAL GEARS FOR GENERAL ENGINEERING

1st EDITION

January 1966

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 467, *Preferred Modules and Diametral Pitches of Cylindrical Gears for General Engineering*, was drawn up by Technical Committee ISO/TC 60, *Gears*, the Secretariat of which is held by the Institut Belge de Normalisation (IBN).

Work on this question by the Technical Committee began in 1956 and led, in 1961, to the adoption of a Draft ISO Recommendation.

In July 1963, this Draft ISO Recommendation (No. 591) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Argentina	Greece	Poland
Austria	India	Spain
Belgium	Italy	Sweden
Chile	Korea, Rep. of	Switzerland
Colombia	Netherlands	United Kingdom
France	New Zealand	Yugoslavia
Germany	Norway	

Four Member Bodies opposed the approval of the Draft:

Australia
Czechoslovakia
Hungary
U.S.S.R.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided, in January 1966, to accept it as an ISO RECOMMENDATION.

**PREFERRED MODULES AND DIAMETRAL PITCHES
OF CYLINDRICAL GEARS FOR GENERAL ENGINEERING**

INTRODUCTION

This ISO Recommendation defines ranges of modules and diametral pitches graduated very regularly, in progressions near to that of preferred numbers series, by selection from the two ranges of modules and diametral pitches of ISO Recommendation R 54, *Modules and Diametral Pitches of Cylindrical Gears for General Engineering*.

This ISO Recommendation has been established for the convenience of those countries which desire to adopt a regularly graduated series of modules and diametral pitches.
