Information technology - Automated infrastructure management (AIM) systems - Requirements, data exchange and applications

ESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN 50667:2016 sisaldab Euroopa standardi EN 50667:2016 ingliskeelset teksti.	This Estonian standard EVS-EN 50667:2016 consists of the English text of the European standard EN 50667:2016.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 23.12.2016.	Date of Availability of the European standard is 23.12.2016.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

English Version

Information technology - Automated infrastructure management (AIM) systems - Requirements, data exchange and applications

Technologies de l'information - Systèmes de gestion d'infrastructure automatisée (AIM, Automated infrastructure management) - Exigences, interfaces et applications

Informationstechnik - Systeme für automatisiertes Infrastrukturmangement (AIM) - Anforderungen, Schnittstellen und Anwendungen

This European Standard was approved by CENELEC on 2016-10-24. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

This document (EN 50667:2016) has been prepared by CLC/TC 215 "Electrotechnical aspects of telecommunication equipment", based upon ISO/IEC 18598:2016 "Information technology – Automated infrastructure management (AIM) systems – Requirements, data exchange and applications".

The following dates are fixed:

latest date by which this document has to (dop) [2017-07-24]

be implemented at national level by publication of an identical national standard or by endorsement

latest date by which the national standards (dow) [2019-10-24]

conflicting with this document have to be withdrawn

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

Introduction

This European Standard is intended for:

- a) premises owners and facility managers;
- b) suppliers of AIM solutions;
- c) planners of network infrastructures;
- d) network operation managers;
- e) data centre operation managers;
- f) IT process managers;
- g) suppliers of management system software;
- h) software integrators.

This European Standard is one of a number of documents prepared in support of European Standards and Technical Reports produced by CLC/TC 215.

1 Scope

This European Standard specifies the requirements and recommendations for the attributes of automated infrastructure management (AIM) systems.

This European Standard explains how AIM systems can contribute to operational efficiency and deliver benefits to:

- a) cabling infrastructure and connected device administration;
- b) facilities and IT management processes and systems;
- c) other networked management processes and systems (e.g. intelligent building systems);
- d) business information systems covering asset tracking and asset management together with event notifications and alerts that assist with physical network security.

This European Standard specifies a framework of requirements and recommendations for data exchange with other systems.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

Not applicable.

3 Terms, definitions and abbreviations

3.1 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1.1

AIM-enabled port

port which is able to automatically detect the insertion and removal of a cord and process that event as part of an automated infrastructure management system

3.1.2

AIM hardware

combination of patch panels and controllers that are designed to automatically detect the insertion or removal of cords, to record connectivity information, and to exchange connectivity information with AIM software

3.1.3

AIM system

integrated hardware and software system that automatically detects the insertion or removal of cords, documents the cabling infrastructure including connected equipment enabling management of the infrastructure and data exchange with other systems

3.1.4

alarm

event of sufficient importance to be highlighted within the AIM system
