Textile machinery and accessories — Shuttles for pirn changing automatic looms — Dimensions

Matériel pour l'industrie textile — Navettes pour changement automatique de canettes — Dimensions

First edition — 1976-08-01

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 72 has reviewed ISO Recommendation R 572 and found it technically suitable for transformation. International Standard ISO 572 therefore replaces ISO Recommendation R 572-1967 to which it is technically identical.

ISO Recommendation R 572 was approved by the Member Bodies of the following countries :

Chile	Greece	Switzerland
Czechoslovakia	Korea, Rep. of	Turkey
Egypt, Arab Rep. of	Netherlands	United Kingdom
France	Poland	
Germany	Spain	

The Member Bodies of the following countries expressed disapproval of the Recommendation on technical grounds :

India
U.S.S.R.

The Member Bodies of the following countries disapproved the transformation of ISO/R 572 in an International Standard :

Belgium
Germany
India
Poland

Textile machinery and accessories — Shuttles for pirn changing automatic looms — Dimensions

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies the dimensions of 90° shuttles for pirn changing automatic looms used in the textile industry.

2 REFERENCE

ISO 143, *Textile machinery and accessories — Weft pirns for automatic looms*.¹⁾

1) At present at the stage of draft. (Revision of ISO/R 143-1960.)
