Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 10845-6 was prepared by Technical Committee ISO/TC 59, *Buildings and civil engineering works*.

ISO 10845 consists of the following parts, under the general title *Construction procurement*:

- *Part 1: Processes, methods and procedures*
- *Part 2: Formatting and compilation of procurement documentation*
- *Part 3: Standard conditions of tender*
- *Part 4: Standard conditions for the calling for expressions of interest*
- *Part 5: Participation of targeted enterprises in contracts*
- *Part 6: Participation of targeted partners in joint ventures in contracts*
- *Part 7: Participation of local enterprises and labour in contracts*
- *Part 8: Participation of targeted labour in contracts*

Introduction

Procurement is the process which creates, manages and fulfils contracts. Procurement can, as such, be described as a succession of logically related actions occurring or performed in a definite manner and which culminate in the completion of a major deliverable or the attainment of a milestone. Processes, in turn, are underpinned by methods (i.e. a documented, systematically ordered collection of rules or approaches) and procedures (i.e. the formal steps to be taken in the performance of a specific task), which are informed and shaped by the policy of an organization. Methods and procedures can likewise be documented and linked to processes.

It is becoming increasingly important to consider procurement-related deliverables other than those relating to the primary purpose of the procurement itself, particularly those relating to poverty reduction, job creation, local economic development and local industry development. Key performance indicators relating to the engagement of enterprises, joint venture partners, local resources and local labour in contracts are needed to set targets in contracts or to measure procurement outcomes. Processes, procedures and methods are required to quantify, measure and verify a contractor's performance in relation to such indicators in an auditable manner.

Construction procurement —

Part 6:

Participation of targeted partners in joint ventures in contracts

1 Scope

This part of ISO 10845 establishes a key performance indicator, in the form of a contract participation goal, relating to the engagement of targeted partners in a joint venture on a contract for the provision of goods, services or engineering and construction works. A contract participation goal may be used to measure the outcomes of a contract in relation to the engagement of targeted partners in a joint venture or to establish a target level of performance for the contractor to achieve or exceed in the performance of a contract.

This part of ISO 10845 sets out the methods by which the key performance indicator can be measured, quantified and verified in the performance of the contract in respect of two different targeting strategies: targeting strategy A and targeting strategy B (defined below).

NOTE Annex A contains commentary on the clauses in this part of ISO 10845. Annex B provides guidance on how to develop the targeting data for a procurement document using this part of ISO 10845.

2 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

2.1

allowance

amount provided for in the contract by the employer relating to one or more of the following:

- a) the performance by the contractor of work or services that are foreseen but cannot be accurately specified at the time the contract is entered into;
- b) work or services to be performed, or goods provided, by a subcontractor, who is either nominated by the employer or selected by the employer in consultation with the contractor after the award of the contract;
- c) provision for price adjustment for inflation; or
- d) other budgetary provisions intended to cover employer risks

2.2

commercially useful function

performance of real and actual work, or the provision of services, in the discharge of any contractual obligation which includes, but is not limited to, the performance of a distinct element of work which the enterprise has the skills and expertise to undertake and the responsibility for management and supervision
