Oil of lemon, Italy, obtained by expression

Huile essentielle de citron, Italie, obtenue par expression

First edition — 1981-09-15

UDC 665.526.474

Ref. No. ISO 855-1981 (E)

Descriptors : essential oils, lemon, materials specifications.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 855 was developed by Technical Committee ISO/TC 54, *Essential oils*, and was circulated to the member bodies in November 1979.

It has been approved by the member bodies of the following countries :

| | | |
|----------|-------------|-----------------------|
| Austria | France | South Africa, Rep. of |
| Brazil | India | Spain |
| Bulgaria | Italy | USSR |
| Canada | Philippines | |
| Chile | Portugal | |

The member body of the following country expressed disapproval of the document on technical grounds :

Netherlands

This International Standard cancels and replaces ISO Recommendation R 855-1968, of which it constitutes a technical revision.

Oil of lemon, Italy, obtained by expression

1 Scope and field of application

This International Standard specifies certain characteristics of oil of lemon, Italy, obtained by expression, with a view to facilitating the assessment of its quality.

3 Definition

oil of lemon, Italy, obtained by expression : The oil extracted, without heating, by mechanical treatment from the fresh pericarp of the fruit of *Citrus limon* (Linnaeus) N.L. Burman, grown in Italy.

4 Requirements

4.1 Appearance

Mobile clear liquid, which may become cloudy by lowering the temperature.

4.2 Colour

Pale yellow to pale greenish-yellow.

4.3 Odour

Characteristic of fresh pericarp of lemon.

4.4 Relative density, at 20/20 °C

Minimum : 0,849

Maximum : 0,858

4.5 Refractive index at 20 °C

Minimum : 1,474 0

Maximum : 1,476 0

4.6 Optical rotation at 20 °C

Range from + 57° to + 65°

4.7 Residue on evaporation

Minimum : 1,6 %

Maximum : 3,9 %

4.8 Acid value

Maximum : 3,0

4.9 Carbonyl value

Minimum : 11

Maximum : 17

4.10 CD value

Minimum : 0,450

Maximum : 0,950

Dilution of 0,25 g of oil in 100 ml of 95 % (V/V) ethanol
