Ref. No. ISO 1020-1974 (E)

Descriptors : cinematography, motion-picture film, bobbins, dimensions, specifications.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 36 has reviewed ISO Recommendation R 1020 and found it suitable for transformation. International Standard ISO 1020 therefore replaces ISO Recommendation R 1020-1969.

ISO Recommendation R 1020 was approved by the Member Bodies of the following countries :

Belgium	France	Korea, Rep. of
Brazil	Germany	Netherlands
Bulgaria	Greece	Romania
Canada	Hungary	Sweden
Chile	Israel	Switzerland
Czechoslovakia	Italy	United Kingdom
Egypt, Arab Rep. of	Japan	U.S.A.

No Member Body expressed disapproval of the Recommendation.

No Member Body disapproved the transformation of ISO/R 1020 into an International Standard.

Cinematography — Spools, daylight loading type for double-8 mm motion-picture cameras — Dimensions

1 SCOPE AND FIELD OF APPLICATION

1.1 This International Standard specifies the dimensions of daylight loading spools of nominal capacities 7,5 m (25 ft), 15 m (50 ft) and 30 m (100 ft) for double-8 mm Type R motion-picture film.

1.2 Spools for high-speed cameras generally should be more carefully balanced and are not necessarily covered by this International Standard.
