## Rotary and percussive pneumatic tools – Performance tests

Machines pneumatiques rotatives, percutantes et roto-percutantes - Essais de fonctionnement

Second edition - 1984-01-15

Ref. No. ISO 2787-1984 (E)

Descriptors : tools, pneumatic tools, performance tests, definitions, classification, specifications, test results.

## Foreword

ISO (the International Organization of Standardization) is a worldwide federation of national standards bodies (ISO member Dodies). The work of developing International Standards is carried out through ISO rechnical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.  $\hat{O}$

United Kingdom

International Standard ISO 2787 was developed by Technica Committee ISO/TC 118, Compressors, pneumatic tools and pneumatic machines, and as circulated to the member bodies in September 1982.

It has been approved by the member bodies of the following countries

Austria Belgium Czechoslovakia Egypt, Arab Rep. of France

Germany, F. R. India Mexico Netherlands Poland

No member body expressed disapproval of the document.

74). 74). This second edition cancels and replaces the first edition (i.e. ISO 2787-1974).
