EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN 15129:2018 sisaldab Euroopa standardi EN 15129:2018 ingliskeelset teksti.	This Estonian standard EVS-EN 15129:2018 consists of the English text of the European standard EN 15129:2018.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 23.05.2018.	Date of Availability of the European standard is 23.05.2018.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

Anti-seismic devices

Dispositifs anti-sismiques

Erdbebenvorrichtungen

This European Standard was approved by CEN on 8 February 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

C.1	Functional requirements.....	126

C.2	Material properties.....	126
C.3	Design Requirements	127
C.4	Testing.....	127
C.4.1	General	127
C.4.2	Low velocity test.....	128
C.4.3	Seal Wear Test	129
C.4.4	Impulsive Load Test.....	129
C.4.5	Overload Test.....	130
C.4.6	Cyclic Load Test.....	130
Annex D	(informative) Commentary to Clause 6: Displacement Dependent Devices.....	131
D.1	Categories of Non Linear Devices (NLD).....	131
D.2	Examples of linear devices — Elastomeric shear-strained devices	133
D.3	Examples of nonlinear devices	133
D.3.1	Buffer.....	133
D.3.2	Steel hysteretic energy dissipating devices	133
D.3.3	Buckling Restrained Braces.....	134
D.3.4	SMA Re-centring Devices	134
Annex E	(informative) Commentary to Clause 7: Velocity Dependent Devices.....	135
E.1	Functional requirements	135
E.2	Design Requirements	137
E.2.1	General	137
E.3	Testing.....	139
E.3.1	General	139
E.3.2	Low velocity test for Fluid Viscous Dampers.....	139
E.3.3	Low velocity test for Fluid Spring Dampers	140
E.3.4	Constitutive law test for Fluid Viscous Dampers.....	141
E.3.5	Constitutive law test for Fluid Spring Dampers.....	141
E.3.6	Damping efficiency test	142
Annex F	(informative) Commentary to Clause 8: Isolators.....	144
F.1	Ageing conditions for elastomeric isolators	144
F.2	Low temperature crystallization	144
F.3	Commentary on Basis of design.....	145
F.3.1	Shape Factor	145
F.3.2	Design shear strain due to compression by vertical loads	145
F.3.3	Isolator stiffnesses	146
F.4	Curved Surface Slider force.....	147
F.5	Determination of the Restoring Stiffness by tests for Curved Surface Sliders	149
F.6	Simultaneous application of a sinusoidal displacement input waveforms in two perpendicular in plane directions.....	150
Annex G	(normative) Equipment for combined compression and shear test and data analysis.....	151
G.1	General requirements.....	151
G.2	Data Acquisition.....	151
G.3	Combined compression and shear equipment	151
G.4	Load Platens	152
G.5	Data analysis	152
Annex H	(informative) Design of Connections for Devices.....	154
H.1	Elastomeric Isolators	154
H.2	Sliders	154

Annex I (informative) Method for calculating pressure distributions on curved sliding surfaces	156
I.1 General	156
I.2 Modelling assumptions	156
I.3 Cylindrical surfaces	156
I.3.1 General	156
I.3.2 Vertical loads	157
I.3.3 Horizontal loads	159
I.3.4 Combined loads	159
I.4 Spherical surfaces	160
I.4.1 General	160
I.4.2 Effects of vertical loads	161
I.4.3 Effects of horizontal loads	162
I.5 Combined loads	162
Annex J (informative) λ-Factors for common isolator types	164
J.1 λ_{\max} values for elastomeric isolators	164
J.2 λ_{\max} values for sliding isolator units	165
Annex ZA (informative) Relationship of this European Standard with Regulation (EU) No.305/2011	167
Bibliography	177

European foreword

This document (EN 15129:2018) has been prepared by Technical Committee CEN/TC 340 “Anti-seismic devices”, the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2018, and conflicting national standards shall be withdrawn at the latest by November 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 15129:2009.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Regulation 305/2011.

For relationship with EU Regulation 305/2011, see informative Annex ZA, which is an integral part of this document.

The main changes with respect to the previous edition are listed below:

- editorial revision;
- new subclause 10.1 AVCP;
- new Annex ZA.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

1 Scope

This document covers the design of devices that are provided in structures, with the aim of modifying their response to the seismic action. It specifies functional requirements and general design rules of the devices for the seismic and non-seismic design situations, material characteristics, manufacturing and testing requirements, as well as assessment and verification of constancy of performance, installation and maintenance requirements. This document covers the types of devices and combinations thereof as defined in 3.4.

NOTE Additional information concerning the scope of this document is given in Annex A.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
