

Elektripaigaldiste torusüsteemid. Osa 2-2: Erinõuded painutatavatele torusüsteemidele

Conduit systems for electrical installations - Part 2-2:
Particular requirements for pliable conduit systems

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 50086-2-2:2001 sisaldab Euroopa standardi EN 50086-2-2:1995 + A11:1998 ingliskeelset teksti.

Standard on kinnitatud Eesti Standardikeskuse 10.10.2001 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.

Standard on kättesaadav Eesti standardiorganisatsioonist.

This Estonian standard EVS-EN 50086-2-2:2001 consists of the English text of the European standard EN 50086-2-2:1995 + A11:1998.

This standard is ratified with the order of Estonian Centre for Standardisation dated 10.10.2001 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.

The standard is available from Estonian standardisation organisation.

This European Standard was approved by CENELEC on 1994-12-06. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

Foreword

This European Standard has been prepared by CENELEC Technical Committee TC 113, Cable Management Systems.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 50086-2-2 on 1994-12-06.

This Part 2-2 specifies particular requirements for pliable conduit systems.

A conduit system which complies with this standard, is deemed safe for use.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 1995-12-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 1996-12-01

For products which have complied with the relevant national standard before 1996-12-01, as shown by the manufacturer or by a certification body, this previous standard may continue to apply for production until 2001-12-01.

This Part 2-2 supplements or modifies the corresponding clauses of EN 50086-1:1993, Conduit systems for electrical installations, Part 1: General requirements.

Where a particular clause or subclause of Part 1 is not mentioned in this Part 2-2, that clause or subclause applies as far as is reasonable. Where this Part 2-2 states "addition", "modification" or "replacement", the relevant text of Part 1 is to be adapted accordingly.

Subclauses, tables and figures which are in addition to those in Part 1 are numbered starting with 101. Annexes which are in addition to those in Part 1 are labelled AA, BB, etc.

Contents

Clause

1	Scope	4
2	Normative references	4
3	Definitions	4
4	General requirements	4
5	General conditions for tests	4
6	Classification	4
7	Marking and documentation	5
8	Dimensions	5
9	Construction	6
10	Mechanical properties	7
11	Electrical properties	8
12	Thermal properties	9
13	Fire effects	9
14	External influences	9
15	Electromagnetic compatibility	9

Tables

101	Thread lengths	6
102	Maximum entry diameters and minimum entry lengths	6

Figures

101	Bending test apparatus	10
102	Gauge for checking the minimum inside diameter of conduits after bending and resistance to heat tests	11
103	Assembly of conduit and terminating fitting for bonding test	12

Annexe AA	(informative) - A-deviations	13
------------------	-------------------------------------	-----------

1 Scope

This clause of Part 1 is applicable, except as follows:

Addition:

This standard specifies the requirements for pliable conduit systems including self-recovering conduit systems.

Conduit systems which are used as an integral part of other equipment also have to be tested according to the relevant standard for that equipment.

2 Normative references

This clause of Part 1 is applicable.

3 Definitions

This clause of Part 1 is applicable.

4 General requirements

This clause of Part 1 is applicable.

5 General conditions for tests

This clause of Part 1 is applicable.

6 Classification

This clause of Part 1 is applicable, except as follows:

6.1.1.1, 6.1.2.1, 6.1.3.1, 6.1.3.4, 6.1.4.1 and 6.1.5.1 are not applicable.
