

Alarm systems - Alarm transmission systems and equipment -- Part 1-5: Requirements for Packet Switched Network PSN

Alarm systems - Alarm transmission systems and equipment -- Part 1-5: Requirements for Packet Switched Network PSN

EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

Käesolev Eesti standard EVS-EN 50136-1-5:2008 sisaldab Euroopa standardi EN 50136-1-5:2008 ingliskeelset teksti.

Standard on kinnitatud Eesti Standardikeskuse 28.04.2008 käskkirjaga ja jõustub sellekohase teate avaldamisel EVS Teatajas.

Euroopa standardimisorganisatsioonide poolt rahvuslikele liikmetele Euroopa standardi teksti kättesaadavaks tegemise kuupäev on 28.03.2008.

Standard on kättesaadav Eesti standardiorganisatsioonist.

This Estonian standard EVS-EN 50136-1-5:2008 consists of the English text of the European standard EN 50136-1-5:2008.

This standard is ratified with the order of Estonian Centre for Standardisation dated 28.04.2008 and is endorsed with the notification published in the official bulletin of the Estonian national standardisation organisation.

Date of Availability of the European standard text 28.03.2008.

The standard is available from Estonian standardisation organisation.

ICS 13.320, 33.040.40

This European Standard was approved by CENELEC on 2008-02-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Comité Européen de Normalisation Electrotechnique
Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

Foreword

This European Standard was prepared by the Technical Committee CENELEC TC 79, Alarm systems.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 50136-1-5 on 2008-02-01.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2009-02-01
 - latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2011-02-01
-

1 Scope

This European Standard specifies the requirements for alarm transmission systems using Packet Switched Networks (PSN), which are additional to those in EN 50136-1-1:1998.

The alarm transmission system using PSN may use wired links, voice grade signalling links, mobile networks, radio or data links and may include ethernet switches, hubs, firewalls, ADSL-routers and DSL-modems. The standard is also applicable to alarm transmission systems in which signalling links are shared with other services within the above descriptions.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 50136-1-1:1998 Alarm systems - Alarm transmission systems and equipment –
+ A1:2001 Part 1-1: General requirements for alarm transmission systems
+ A2:2008

3 Terms and definitions

For the purpose of this document the terms and definitions given in EN 50136-1-1:1998, 4.7 and in EN 50136-1-1:1998/A2:2008, apply to reflect the additional security required.

4 Objective

The objective of this European Standard is to specify the additional performance characteristics of alarm transmission systems using PSN to ensure suitability for use and compatibility with different types of alarm systems. For compliance with this document alarm transmission equipment and alarm transmission systems shall conform to the details set out in EN 50136-1-1:1998. These additional requirements are to address the specific risks associated with the use of the PSN environment, which may or may not operate over the public network, e.g. internet or a private network e.g. Intranet.

5 Transmission network requirements

5.1 Generalities

PSN used for alarm transmission systems within the scope of this European Standard shall conform to the requirements of EN 50136-1-1:1998 that no spurious alarm outputs shall occur when the alarm transmission system is restored to normal after a fault. In addition the following requirements shall be met (see 5.2 to 5.4).

NOTE 1 Transmission network components:

Network components including ADSL modems, DSL modems, routers, ethernet switches, Ethernet hubs, external firewalls and network wiring etc. may not meet the requirements in the standard for alarm transmission equipment in EN 50136-2-1. Ethernet modules/interfaces at the alarm transceiver are not part of the transmission network.

NOTE 2 Network power fails reporting to alarm receiving centre: Network equipment, which is located at the supervised premises, which is not classified, as being part of the alarm transmission equipment is therefore not required to have a secondary power supply.

5.2 Transmission link requirement

Any unwanted, malformed or otherwise malicious incoming data received from one transmission link at a rate not exceeding the full capacity of the link shall not prevent the link to perform as specified.
