EUROPEAN STANDARD

EN 50272-2

NORME EUROPÉENNE

EUROPÄISCHE NORM

June 2001

ICS 29.220.20

English version

**Safety requirements for secondary batteries and battery installations
Part 2: Stationary batteries**

Règles de sécurité pour les batteries et
les installations de batteries
Partie 2: Batteries stationnaires

Sicherheitsanforderungen an Batterien
und Batterieanlagen
Teil 2: Stationäre Batterien

This European Standard was approved by CENELEC on 2000-08-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

CENELEC

European Committee for Electrotechnical Standardization
Comité Européen de Normalisation Electrotechnique
Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

Foreword

This European Standard was prepared by the Technical Committee CENELEC TC 21X, Secondary cells and batteries.

The text of the draft was submitted to the formal vote and was approved by CENELEC on 2000-08-01.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2001-12-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2003-04-01

Annexes designated "informative" are given for information only.
In this standard, annexes A and B are informative.

This document is a preview generated by EVS

Introductory note

1. For the preparation of EN 50272-2 the following European country's national standards have been taken into consideration:

Germany:	DIN VDE 0510 Part 2 Batteries and battery installations
United Kingdom:	BS 6133 for lead-acid batteries BS 6132 for NiCd batteries
Sweden:	SS 408 01 10 relating parts for rechargeable batteries, erection and ventilation
Switzerland:	SEV 1000-1 and SEV 1000-2 relating parts of instructions for installations in buildings
Italy:	Doc. D.P.R. 547, art. 302 and 303 , Safety in battery installations CEI 21-6 Part 3
Netherlands:	NEN 1010 relating parts of safety regulations for low voltage installations
Austria	ÖVE-C10 Part 2 , Batteries and battery installations
France	NF C15-100 , article 554 Batteries d'accumulateurs Article EC10, Règlement de sécurité contre l'incendie relatif aux établissements recevant du public

Only those paragraphs have been considered where common agreement was found or specific need was recognised.

2. The described safety requirements comprise the protective measures to protect from hazards generated by the electricity, the electrolyte, and the explosive gases when using secondary batteries. In addition measures are described to maintain the functional safety of batteries and battery installations.
3. For the electrical safety (protection against electric shock) under clause 5 this document refers to HD 384.4.41 (IEC 60364-4-41). The pilot function of this standard is fully observed by indication of cross-reference numbers of the relevant clauses. But interpretation is given where adoption to direct current (DC) circuits is required.
4. This safety standard comes into force with the date of publication and applies to all new batteries and battery installations. Previous installations shall conform with the existing national standards at the time of installation. In case of redesign of old installations this standard applies.

Annex A (informative) Charging methods, modes of operation.....	25
Annex B (informative) Calculation of safety distance d to protect against explosion hazards.....	29

1 Scope

This European Standard applies to stationary secondary batteries and battery installations with a maximum voltage of DC 1500 V (nominal) and describes the principal measures for protections against hazards generated from:

- electricity,
- gas emission,
- electrolyte.

It provides requirements on safety aspects associated with the erection, use, inspection, maintenance and disposal.

It covers lead-acid and NiCd batteries.

2 Main applications

Examples for the main applications are:

- Telecommunications,
- Power Station Operation,
- Central Emergency Lighting and Alarm Systems,
- Uninterruptible Power Supplies,
- Stationary Engine Starting,
- Photovoltaic Systems.

3 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

4 General definitions

4.1 (secondary) cell; (rechargeable) cell; single cell

An assembly of electrodes and electrolyte which constitutes the basic unit of a secondary battery. (see IEC 60050-486-01-02)

NOTE This assembly is contained in an individual case and closed by a cover.

4.2 vented (secondary) cell

A secondary cell having a cover provided with an opening through which gaseous products may escape. (see IEC 60050-486-01-18)
