Reduction sleeves with 7/24 external and Morse internal taper and incorporated screw

Douilles de réduction aux cônes extérieur 7/24 et intérieur Morse, avec vis incorporée

First edition — 1977-03-15

UDC 621.9-229.2

Ref. No. ISO 5415-1977 (E)

Descriptors : tools, power-operated tools, Morse taper shanks, adapter sleeves, specifications, dimensions.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5415 was developed by Technical Committee ISO/TC 29, *Small tools*, and was circulated to the member bodies in March 1976.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Romania
Austria	India	South Africa, Rep. of
Belgium	Israel	Spain
Brazil	Italy	Switzerland
Bulgaria	Japan	Turkey
Czechoslovakia	Mexico	United Kingdom
France	Netherlands	U.S.S.R.
Germany	Philippines	Yugoslavia

No member body expressed disapproval of the document.

Reduction sleeves with 7/24 external and Morse internal taper and incorporated screw

1 SCOPE AND FIELD OF APPLICATION

This International Standard lays down the dimensions of reduction sleeves with 7/24 external taper Nos. 30 – 40 – 45 – 50 and 60 and Morse internal taper Nos. 1 to 6 (Morse tapers Nos. 4 – 5 and 6 being either with positive drive – sleeves of type B – or without positive drive – sleeves of type A).

These sleeves permit driving of tools with Morse taper shanks with tapped holes with the aid of an internal screw. The form of this screw and its fixation in the sleeve are left to the manufacturer's discretion.

7/24 tapers conform to ISO/R 297 and ISO 2583. Morse tapers conform to ISO 296 and ISO 5413.
