This Harmonization Document was approved by CENELEC on 2005-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for implementation of this Harmonization Document at national level.

Up-to-date lists and bibliographical references concerning such national implementations may be obtained on application to the Central Secretariat or to any CENELEC member.

This Harmonization Document exists in three official versions (English, French, German).

CENELEC members are the national electrotechnical committees of Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## Foreword

The text of the International Standard IEC 60364-7-740:2000, prepared by IEC TC 64, Electrical installations and protection against electric shock, together with the common modifications prepared by SC 64B, Protection against thermal effects, of Technical Committee CENELEC TC 64, Electrical installations and protection against electric shock, was submitted to the formal vote and was approved by CENELEC as HD 60364-7-740 on 2005-10-01.

The following dates were fixed:

- latest date by which the existence of the HD (doa) 2006-04-01  
has to be announced at national level
- latest date by which the HD has to be implemented (dop) 2007-03-01  
at national level by publication of a harmonized  
national standard or by endorsement
- latest date by which the national standards conflicting (dow) 2008-10-01  
with the HD have to be withdrawn

Annexes ZA, ZB and ZC have been added by CENELEC.

Clauses, subclauses, notes, tables, figures and annexes which are additional to those of IEC 60364-7-740 are prefixed "Z".

In this standard, the common modifications to the International Standard are indicated by a vertical line in the left margin of the text.

## Introduction

The requirements of this part of HD 60364 modify or replace certain of the general requirements of HD 60364.

The clause numbering of Part 7-740 follows the pattern and corresponding references of IEC 60364.

The numbers following the particular number of Part 7-740 are those of the corresponding parts or clauses of IEC 60364.

The absence of reference to a part or a clause means that the general requirements of HD 60364 are applicable.

Numbering in parenthesis corresponds to the numbering of the “non restructured” IEC 60364 dated before 2002.

### **740.1 (740.11) Scope, object and fundamental principles**

#### **740.1.1 (740.11) Scope**

*Add:*

This part of HD 60364 specifies the minimum electrical installation requirements to facilitate the safe design, installation and operation of temporarily installed mobile or transportable electrical machines and structures which incorporate electrical equipment. The machines and structures are intended to be installed repeatedly, without loss of safety, temporarily, at fairgrounds, amusement parks, circuses or similar places.

NOTE Z1 The permanent electrical installation is excluded from the scope.

The object of this part of HD 60364 is to define the electrical installation requirements for such structures and machines, being either integral parts or constituting the total amusement device.

This part does not apply to the electrical equipment of machines (see EN 60204-1).

NOTE Z2 See also Annex ZA.

#### **740.1.2 (740.12) Normative references**

*Add:*

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE Where an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

<u>Publication</u>	<u>Year</u>	<u>Title</u>	<u>EN/HD</u>	<u>Year</u>
		Cables of rated voltages up to and including 450/750 V and having cross-linked insulation Part 8: Polychloroprene or equivalent synthetic elastomer sheathed cable for decorative chains	HD 22.8 S2	
		Cable trunking systems and cable ducting systems for electrical installations	EN 50085	Series
		Conduit systems for cable management	EN 50086	Series

## 740.2 (740.B.1.0) Definitions

For the purpose of this part of HD 60364, the definitions given in IEC 60050-826 as well as the following definitions apply:

### 740.2.1

#### **fairground**

area where one or more stands, amusement devices or booths are erected for leisure use

### 740.2.2

#### **booth**

non-stationary unit, intended to accommodate equipment generally for pleasure or demonstration purposes

### 740.2.3

#### **stand**

area or temporary structure used for display, marketing, sales or entertainment

### 740.2.4

#### **amusement device**

ride, stand, textile or membrane building, side stall, side show, tent, booth or grandstand intended for the entertainment of the public

### 740.2.Z1

#### **temporary electrical installation**

electrical installation erected and dismantled at the same time as the structure with which it is associated

## 740.3 Assessment of general characteristics

### 740.31 Purposes, supplies and structure

#### 740.313 Supplies

##### 740.313.1.3 Voltage

The nominal supply voltage of a temporary electrical installation in a booth, stand or amusement device shall not exceed 230 V / 400 V a.c or 440 V d.c.
