EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN 17293:2020 sisaldab Euroopa standardi EN 17293:2020 ingliskeelset teksti.	This Estonian standard EVS-EN 17293:2020 consists of the English text of the European standard EN 17293:2020.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 18.03.2020.	Date of Availability of the European standard is 18.03.2020.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile standardiosakond@evs.ee.

Temporary works equipment - Execution - Requirements for manufacturing

Équipements temporaires de chantiers - Exécution -
Exigences pour la fabrication

Temporäre Konstruktionen für Bauwerke - Ausführung
- Anforderungen für die Herstellung

This European Standard was approved by CEN on 22 December 2019.

This European Standard was corrected and reissued by the CEN-CENELEC Management Centre on 22 April 2020.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 17293:2020) has been prepared by Technical Committee CEN/TC 53 “Temporary works equipment”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by September 2020, and conflicting national standards shall be withdrawn at the latest by September 2020.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

Steel, aluminium and timber components for temporary works equipment are usually designed according to Eurocodes.

NOTE Temporary works equipment are products covered by CEN/TC 53, for example, scaffolds, formworks, falseworks.

Components designed specifically for temporary works equipment are not intended to be incorporated in a permanent manner in construction works (buildings or civil engineering works). They are manufactured in accordance with standards within the scope of CEN/TC 53 and not covered by the Construction Products Regulation EU 305/2011. Therefore, EN 1090-1 is not applicable for these components and they are not to be marked CE.

EN 1090-2, EN 1090-3, EN 1090-4, EN 1090-5 give requirements for execution of steel and aluminium components. This document gives special requirements for manufacturing components for temporary works equipment in addition or contrary to the requirements of EN 1090-2, EN 1090-3, EN 1090-4, EN 1090-5, to ensure adequate levels of mechanical resistance and stability, serviceability and durability.

EN 1995-1-1 gives requirements for execution of timber components. This document gives special requirements for manufacturing glued timber joints in components of temporary works equipment.

This document presupposes that manufacturing is carried out with the necessary skill and adequate equipment and resources to perform that manufacturing is in accordance with the requirements of this document.

1 Scope

This document specifies requirements for manufacturing components for temporary works equipment:

- a) in a factory; or
- b) on site where manufacturing in a factory is not practicable.

This document specifies requirements for manufacturing components for temporary works equipment in addition or contrary to the requirements of EN 1090-2, EN 1090-3, EN 1090-4, EN 1090-5 and EN 1995-1-1.

Furthermore, this document specifies requirements for manufacturing timber components, designed according to Eurocodes, to be used in temporary works equipment.

This document does not specify requirements for erection and transportation of temporary works equipment.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
