EESTI STANDARDI EESSÕNA

NATIONAL FOREWORD

See Eesti standard EVS-EN IEC 60436:2025 sisaldab Euroopa standardi EN IEC 60436:2025 ingliskeelset teksti. Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 19.09.2025. Standard on kättesaadav Eesti Standardimis-ja Akrediteerimiskeskusest.	This Estonian standard EVS-EN IEC 60436:2025 consists of the English text of the European standard EN IEC 60436:2025. This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation and Accreditation. Date of Availability of the European standard is 19.09.2025. The standard is available from the Estonian Centre for Standardisation and Accreditation.

English Version

Electric dishwashers for household use - Methods for measuring
the performance
(IEC 60436:2025)

Lave-vaisselle électriques à usage domestique - Méthodes
de mesure de l'aptitude à la fonction
(IEC 60436:2025)

Elektrische Geschirrspüler für den Hausgebrauch -
Messverfahren für Gebrauchseigenschaften
(IEC 60436:2025)

This European Standard was approved by CENELEC on 2025-07-30. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

European foreword

The text of document 59A/273/FDIS, future edition of IEC 60436, prepared by SC 59A "Electric dishwashers" of IEC/TC 59 "Performance of household and similar electrical appliances" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 60436:2025.

The following dates are fixed:

- latest date by which the document has to be implemented at national (dop) 2026-09-30 level by publication of an identical national standard or by endorsement
- latest date by which the national standards conflicting with the (dow) 2026-09-30 document have to be withdrawn

This document supersedes EN 60436:2020 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document is read in conjunction with EN IEC 60436:2025/A11:2025.

This document has been prepared under a standardization request addressed to CENELEC by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

Endorsement notice

The text of the International Standard IEC 60436:2025 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following note has to be added for the standard indicated:

IEC 60704-3:2019 NOTE Approved as EN 60704-3:2019

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications, symboles graphiques et le glossaire. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 500 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 25 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

FOREWORD	8
INTRODUCTION	10
1 Scope	11
2 Normative references	11
3 Terms, definitions and symbols	11
3.1 Terms and definitions	11
3.2 Symbols	16
3.2.1 Symbols related to the application of egg (6.4.5.3)	16
3.2.2 Symbols related to the calculation of the drying index (7.2.3)	16
3.2.3 Symbols related to the calculation of the cleaning index (7.3.2)	16
3.2.4 Symbols related to the measurements (Clause 8 and Annex U)	17
3.2.5 Symbols related to the microwave calibration (Annex F)	17
4 List of measurements	17
5 General conditions for measurements	18
5.1 General	18
5.1.1 General information	18
5.1.2 Free-standing dishwasher (3.1.2)	19
5.1.3 Built-in dishwasher (3.1.3) and integrated dishwashers (3.1.4)	19
5.1.4 Multi-compartment dishwashers (3.1.1)	19
5.2 Sequence of test procedures and conditioning of the test machine (3.1.5)	19
5.3 Electricity supply for machines	20
5.3.1 Electricity supply for test machine (3.1.5)	20
5.3.2 Electricity supply for the reference machine (3.1.6)	20
5.4 Test programme (3.1.14)	20
5.5 Ambient conditions	20
5.6 Water	21
5.6.1 General	21
5.6.2 Water temperature	21
5.6.3 Water hardness	21
5.6.4 Water pressure	22
5.6.5 Additional water quality parameters	22
5.7 Detergent (3.1.23)	22
5.8 Rinse aid (3.1.24)	23
5.9 Salt	23
5.10 Intermittently recurring functions (3.1.40)	23
5.10.1 Provision of information	23
5.10.2 Impact of intermittently recurring functions (3.1.40) on reproducibility and the validity of test results	24
5.10.3 Treatment of intermittently recurring functions (3.1.40)	24
6 Combined cleaning and drying performance tests	24
6.1 General and purpose	24
6.2 Load	25
6.2.1 Composition of the test load	25
6.2.2 Requirements for pre-conditioning of new tableware (3.1.9)	25
6.2.3 Requirements for conditioning of tableware (3.1.9)	25

6.2.4	Requirements for re-conditioning tableware (3.1.9)	25
6.3	Soiling agents and preparation equipment	25
6.4	Preparation and application of soiling agents	26
6.4.1	General	26
6.4.2	Milk	27
6.4.3	Tea	28
6.4.4	Minced meat	30
6.4.5	Egg	31
6.4.6	Oat flakes	32
6.4.7	Spinach	32
6.4.8	Margarine	34
6.5	Drying of the soiled tableware (3.1.9) items	34
6.5.1	General	34
6.5.2	Oven drying method	34
6.5.3	Air drying method	36
6.6	Loading and operating	36
6.6.1	Loading	36
6.6.2	Operating	36
7	Combined cleaning and drying performance assessment	37
7.1	General requirements	37
7.2	Determination of the drying performance	37
7.2.1	General requirements to enable subsequent cleaning assessment	37
7.2.2	Drying assessment procedure	38
7.2.3	Calculation of the drying index	41
7.3	Determination of the cleaning performance	42
7.3.1	General	42
7.3.2	Calculation of the cleaning index	45
7.3.3	Dishwasher (3.1.1) filter systems	46
7.3.4	Assessing $\ln W_C$	47
7.4	Results	47
7.4.1	Expressing drying results	47
7.4.2	Expressing cleaning results	47
8	Energy consumption, water consumption, programme time (3.1.17)	48
8.1	General and purpose	48
8.2	Method of measurement	48
8.3	Method of evaluation	48
8.3.1	General	48
8.3.2	Energy consumption	49
8.3.3	Hot water energy	49
8.3.4	Water consumption	50
8.3.5	Time	50
9	Airborne acoustical noise	50
Annex A (normative)	Place settings (3.1.10) and serving pieces (3.1.11)	51
A.1	General information	51
A.2	Test load specifications	51
Annex B (informative)	Tableware (3.1.9) specifications	56
Annex C (normative)	Illustration of soil application quantities	63
C.1	Soil application	63

C.1.1	Soil application example for type A tableware (3.1.9) items	63
C.1.2	Soil application example for type B tableware (3.1.9) items	63
C.1.3	Soil application on the serving pieces (3.1.11)	64
C.1.4	Soil application quantities for different rated dishwasher capacities (3.1.12).....	64
Annex D (informative)	Pictures of the soiled items	66
Annex E (normative)	Test additives	70
E.1	General.....	70
E.2	Detergent (3.1.23).....	70
E.3	Rinse aid (3.1.24).....	72
E.4	Salt.....	73
Annex F (normative)	Microwave oven.....	74
F.1	Specification of the microwave oven	74
F.2	Calibration of the microwave oven	74
Annex G (normative)	Through-circulation thermal cabinet	76
G.1	Specification of the thermal cabinet	76
G.2	Calibration of the thermal cabinet	76
Annex H (informative)	Alternate cleaning and drying assessment tables.....	78
H.1	General.....	78
H.2	Alternate drying performance table	78
H.3	Alternate cleaning performance table.....	80
Annex I (normative)	Description of the reference machine (3.1.6) type 2	83
I.1	General.....	83
I.2	Installation and use of the reference machine (3.1.6)	83
I.3	Specification of the reference machine (3.1.6)	84
I.3.1	General specifications.....	84
I.3.2	Specifications of performance values.....	84
I.4	Specification check of the reference machine (3.1.6).....	84
I.4.1	General	84
I.4.2	Checking spray arm rotation.....	85
I.4.3	Checking the water hardness	85
I.4.4	Checking the energy consumption and water consumption	85
I.4.5	Checking the programme time (3.1.17)	85
I.4.6	Checking the water temperature in the sump	85
I.4.7	Checking the cleaning and drying performance	85
I.4.8	Checking the water level in the sump.....	86
I.5	Reference machine (3.1.6) loading plan.....	86
Annex J (informative)	Shade chart.....	88
J.1	General.....	88
J.2	Classification of shade numbers	88
Annex K (normative)	Measurement of energy consumption in low power modes of dishwashers (3.1.1)	89
K.1	General.....	89
K.2	Determination of left-on mode (3.1.26) power	91
K.3	Determination of left on mode duration (3.1.33).....	91
K.4	Determination of off mode (3.1.27) power	91
K.5	Determination of standby mode (3.1.29) power	92
K.6	Determination of standby mode in condition of networked standby (3.1.30).....	92

K.7	Determination of delay start mode (3.1.31) power	93
K.8	Measurement procedure for low power modes	94
Annex L (informative)	Suppliers of test materials	97
Annex M (informative)	Test report contents	98
M.1	General.....	98
M.2	Machine description	98
M.3	Laboratory details	98
M.4	Test conditions.....	98
M.5	Test results and measurements	98
M.5.1	Setup.....	98
M.5.2	Results	99
Annex N (normative)	Test enclosure for built-in dishwasher (3.1.3) and integrated dishwashers (3.1.4)	100
Annex O (informative)	Internal evaluation guidelines	102
Annex P (informative)	Test procedure for sensing programmes (3.1.14).....	103
P.1	General.....	103
P.2	General conditions	103
P.3	Loading.....	104
P.4	Soiling	104
P.5	Measured data	104
Annex Q (informative)	Additional rinse performance evaluation	105
Q.1	General.....	105
Q.2	General conditions	105
Q.3	Loading.....	105
Q.4	Evaluation.....	105
Q.5	Measured data	106
Annex R (informative)	Dishwasher (3.1.1) filtration evaluation.....	107
R.1	General.....	107
R.2	General conditions	107
R.3	Test procedure.....	107
R.3.1	General	107
R.3.2	Coffee grounds	107
R.3.3	Spinach	109
R.4	Evaluation.....	109
Annex S (informative)	Flow chart – evaluation of filter systems	113
Annex T (normative)	Instrumentation and accuracy.....	114
Annex U (informative)	Inlet water temperature influence on energy consumption	115
U.1	General.....	115
U.2	Cold water energy correction	115
U.3	Correlating energy consumption tests with different cold water inlet temperatures.....	116
U.3.1	General	116
U.3.2	Estimating regional energy consumption from standard cold water temperature	117
U.3.3	Estimating standard energy consumption from regional cold water temperature	117
Annex V (informative)	Testing intermittently recurring functions (3.1.40)	119
V.1	General.....	119

V.2	Test series (3.1.8) design	119
V.3	Method of evaluation	120
V.3.1	General	120
V.3.2	Energy consumption.....	121
V.3.3	Hot water energy.....	121
V.3.4	Water consumption	121

V.4	Ballast soil	121
V.4.1	Dose.....	121
V.4.2	Preparation.....	122
V.4.3	Storage.....	122
V.4.4	Application.....	122
Annex W (normative)	Description of the reference machine (3.1.6) type 3	126
W.1	General.....	126
W.2	Installation and use of the reference machine (3.1.6)	126
W.3	Specification of the reference machine (3.1.6)	126
W.3.1	General specifications	126
W.3.2	Specifications of performance values.....	127
W.4	Specification check of the reference machine (3.1.6).....	127
W.4.1	General	127
W.4.2	Checking spray arm rotation.....	128
W.4.3	Checking the water hardness	128
W.4.4	Checking the energy consumption and water consumption	128
W.4.5	Checking the temperature during the programme (3.1.14)	128
W.4.6	Checking the programme time (3.1.17)	129
W.4.7	Checking the cleaning and drying performance	129
W.4.8	Checking the water level in the sump.....	129
W.5	Reference machine (3.1.6) loading plan.....	130
Annex X (informative)	Multi-compartment dishwashers (3.1.1)	131
X.1	General.....	131
X.1.1	Multi-compartment dishwasher (3.1.1)	131
X.1.2	Multi-compartment mode	131
X.1.3	Combined rated dishwasher capacity (3.1.12).....	131
X.2	Measurement and evaluation of the compartments of a multi-compartment dishwasher (3.1.1)	131
X.3	Rated capacity and detergent (3.1.23) dosage for compartments operated in multi-compartment mode	131
X.4	Combined cleaning and drying performance tests for dishwasher (3.1.1) in multi-compartment mode	132
X.4.1	Preparation.....	132
X.4.2	Loading and operating.....	132
X.5	Combined cleaning and drying performance assessment for dishwasher (3.1.1) in multi-compartment mode	132
X.5.1	General	132
X.5.2	Assessment of drying performance	132
X.5.3	Assessment of cleaning performance	133
X.6	Energy consumption, water consumption, programme time (3.1.17) in multi-compartment mode.....	133
X.6.1	General	133
X.6.2	Energy consumption.....	133

X.6.3	Water consumption	133
X.6.4	Programme time (3.1.17).....	133
Annex Y (informative)	Implementation of test class	134
Y.1	Overview	134
Y.1.1	General	134
Y.1.2	Test series (3.1.8).....	134
Y.1.3	Test class	134
Y.2	Purpose of test series (3.1.8) – Test class	134
Y.3	Operating.....	135
Y.4	Performance assessment	135
Y.4.1	Cleaning and drying performance assessment	135

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Electric dishwashers for household use - Methods for measuring the performance

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60436 has been prepared by subcommittee 59A: Electric dishwashers, of IEC technical committee 59: Performance of household and similar electrical appliances. It is an International Standard.

This fifth edition cancels and replaces the fourth edition published in 2015, and Amendment 1:2020. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Implementation of a new reference machine, which better reflects modern dishwasher energy and water saving technologies. Its ability to function as a reference machine for the cleaning assessment was assessed in a Round Robin Test.
- b) Implementation of the new reference detergent type E, which better reflects market detergents formulations. It includes upgraded enzymes and a lower content of silicates to reduce the alkalinity which simplifies the world wide transportation by avoiding dangerous goods labelling and therefore improves the usage all over the world.
- c) Implementation of an alignment factor for the cleaning performance assessment as proposed in a scientific study done by an university to align test results of the previous version to the new version of this document with the new reference system described above.
- d) Introduction of replacements and alternatives for the pan and knives as the production of the current ones was stopped.
- e) Improvement of the room temperature control by a temperature measurement inside the dishwasher directly prior to the start of the test programme.
- f) Update of the weight of different load items and the specified ranges to anneal the requirements in the document to the actual weight of the items.
- g) Introduction of an updated method to assess low power modes providing a step-by-step measurement description and including new modes, e.g. network standby which are of increased importance for dishwasher offering additional services via internet connection. Additionally, reactions to different interactions with the appliance can be assessed in a better way and learnings of Round Robin Test are included.
- h) Inclusion of additional method for dishwasher testing which allows the assessment of variations of dishwasher units from one model.
- i) New requirements for the loading and handling instructions for tests institutes.
- j) Implementation of testing methodology for multi-compartment dishwashers.
- k) Improvement of ballast soil preparation process in Annex V.

The text of this International Standard is based on the following documents:

Draft	Report on voting
59A/273/FDIS	59A/276/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn, or
- revised.

INTRODUCTION

The history of this fifth edition of IEC 60436 is provided as follows:

- Discussion began in fourth quarter of 2021 during one of the web conferences of Maintenance Team 2.
- A first working draft was developed and discussed during the Qingdao China meeting in September 2023.
- It was decided by SC 59A to proceed directly to CDV, skipping CD stage, due to urgency of implementation of the new [detergent \(3.1.23\)](#) E. This urgency is caused by production termination of enzymes used for [detergent \(3.1.23\)](#) D composition.
- Implementation of new reference system, the new reference [detergent \(3.1.23\)](#) and the new [reference machine \(3.1.6\)](#), is done based on data coming from Round Robin Test conducted in 2022-2023.

1 Scope

This document applies to electric **dishwashers (3.1.1)** for household and similar use that are supplied with hot and/or cold water.

The object of this document is to state and define the principal performance characteristics of electric **dishwashers (3.1.1)** for household and similar use and to describe the standard methods of measuring these characteristics.

This document is concerned neither with safety nor with minimum performance requirements.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60704-2-3, *Household and similar electrical appliances – Test code for the determination of airborne acoustical noise – Part 2-3: Particular requirements for dishwashers*

IEC 60705, *Household microwave ovens – Methods for measuring performance*

IEC 60734:2012, *Household electrical appliances - Performance - Water for testing*

IEC 62301:2011, *Household electrical appliances - Measurement of standby power*

IEC 63474, *Electrical and electronic household and office equipment - Measurement of networked standby power consumption of edge equipment*

ISO 607, *Surface active agents and detergents – Methods of sample division*

ISO 80000-1:2022, *Quantities and units — Part 1: General*

DIN 51757, *Testing of mineral oils and related materials - Determination of density*

EN 1262, *Surface active agents - Determination of pH value of solutions or dispersions*

3 Terms, definitions and symbols

3.1 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- IEC Electropedia: available at <https://www.electropedia.org/>
- ISO Online browsing platform: available at <https://www.iso.org/obp>
