This European Standard was approved by CEN on 1996-03-06.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Foreword

International Standard

ISO 8189:1992 Solid fertilizers – Determination of moisture content – Gravimetric method by drying under reduced pressure, which was prepared by ISO/TC 134 'Fertilizers and soil conditioners' of the International Organization for Standardization has been adopted as European Standard by CEN/TC 260 'Fertilizers and liming materials', the Secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, and conflicting national standards withdrawn, by March 1997 at the latest.

In accordance with the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard:

Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Endorsement notice

The text of the International Standard ISO 8189:1992 was approved by CEN as a European Standard with agreed common modifications as given below.

- a) The title and scope of the standard have been extended to include liming materials.
- b) In the list of fertilizers to which the method is not applicable, the reference to magnesium sulfate has been amended to 'magnesium sulfate containing one to seven molecules of water of crystallization for each molecule of magnesium sulfate'.
- c) In clauses 2 and 6, the reference to ISO 8358:1991 has been replaced by EN 1482:1996.
- d) In clause 9, a requirement to include the method of sampling and sample preparation in the test report has been added.
- e) A bibliography has been added as informative annex ZA.

The common modifications have been inserted in the text of the reference document and indicated by a vertical line in the left margin.
