Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 8583-3 was prepared by Technical Committee ISO/TC 68, *Banking, securities and other financial services*, Subcommittee SC 6, *Retail financial services*.

This second edition cancels and replaces the first edition (ISO 8583-3:1998), which has been technically revised.

ISO 8583 consists of the following parts, under the general title *Financial transaction card originated messages — Interchange message specifications*:

⎯ *Part 1: Messages, data elements and code values*

⎯ *Part 2: Application and registration procedures for Institution Identifier Codes (IIC)*

⎯ *Part 3: Maintenance procedures for messages, data elements and code values*

Financial transaction card originated messages — Interchange message specifications —

Part 3:
Maintenance procedures for messages, data elements and code values

1 Scope

This part of ISO 8583 establishes the role of the maintenance agency (MA) and specifies the procedures for adding messages and data elements to ISO 8583-1 and to codes listed in Annex A of ISO 8583-1.

The responsibilities of the MA relate to all message type identifiers and classes, data elements and sub-elements, dataset identifiers and codes within ISO 8583-1, with the exception of Institution Identification Codes.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 8583-1, *Financial transaction card originated messages — Interchange message specifications — Part 1: Messages, data elements and code values*

ISO 8583-2, *Financial transaction card originated messages — Interchange message specifications — Part 2: Application and registration procedures for Institution Identification Codes (IIC)*

3 Terms and definitions

For the purposes of this document, the following terms and definitions given in ISO 8583-1 and the following apply.

3.1
sponsoring authority
entity that submits requests for changes to ISO 8583 (all parts) to the RMMG

4 Application procedures

4.1 Application procedure for changes to ISO 8583-1

An applicant shall apply to the appropriate sponsoring authority to request approval of a new message type identifier or class, data element or sub-element, dataset identifier or code value by providing the information specified in Annex A.
