Live working - Hand tools for use up to 1 000 V AC and 1 500 V DC

## EESTI STANDARDI EESSÕNA

## NATIONAL FOREWORD

See Eesti standard EVS-EN IEC 60900:2018 sisaldab Euroopa standardi EN IEC 60900:2018 ingliskeelset teksti.	This Estonian standard EVS-EN IEC 60900:2018 consists of the English text of the European standard EN IEC 60900:2018.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 24.08.2018.	Date of Availability of the European standard is 24.08.2018.
Standard on kättesaadav Eesti Standardikeskusest.	The standard is available from the Estonian Centre for Standardisation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile [standardiosakond@evs.ee](mailto:standardiosakond@evs.ee).

ICS 13.260, 29.240.20, 29.260.99

Standardite reprodutseerimise ja levitamise õigus kuulub Eesti Standardikeskusele

Andmete paljundamine, taastekitamine, kopeerimine, salvestamine elektroonsesse süsteemi või edastamine ükskõik millises vormis või millisel teel ilma Eesti Standardikeskuse kirjaliku loata on keelatud.

Kui Teil on küsimusi standardite autorikaitse kohta, võtke palun ühendust Eesti Standardikeskusega:

EUROPEAN STANDARD

**EN IEC 60900**

NORME EUROPÉENNE

EUROPÄISCHE NORM

August 2018

ICS 13.260; 29.240.20; 29.260.99

Supersedes EN 60900:2012

English Version

**Live working - Hand tools for use up to 1 000 V AC and 1 500 V  
DC  
(IEC 60900:2018)**

Travaux sous tension - Outils à main pour usage jusqu'à 1  
000 V en courant alternatif et 1 500 V en courant continu  
(IEC 60900:2018)

Arbeiten unter Spannung - Handwerkzeuge zum Gebrauch  
bis AC 1 000 V und DC 1 500 V  
(IEC 60900:2018)

This European Standard was approved by CENELEC on 2018-07-25. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## European foreword

The text of document 78/1221/FDIS, future edition 4.0 of IEC 60900, prepared by IEC/TC 78 "Live working" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 60900:2018.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2019-04-25
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2021-07-25

This document supersedes EN 60900:2012

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

## Endorsement notice

The text of the International Standard IEC 60900:2018 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following note has to be added for the standards indicated:

IEC 60743 NOTE Harmonized as EN 60743

## Annex ZA (normative)

### Normative references to international publications with their corresponding European publications

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 Where an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: [www.cenelec.eu](http://www.cenelec.eu).

5.5 Dielectric tests .....	28
5.5.1 General requirements .....	28
5.5.2 Conditioning (for type test only) .....	29
5.5.3 Dielectric testing of insulated and hybrid hand tools .....	29
5.5.4 Dielectric testing of insulating hand tools .....	32
5.6 Indentation test (for <i>insulated hand tools</i> ) .....	33
5.6.1 Type test .....	33
5.6.2 Alternative methods in cases where insulated hand tools have completed the production phase .....	34
5.7 Test for adhesion of the insulating material coating of insulated hand tools.....	34
5.7.1 Conditioning .....	34
5.7.2 Type test .....	35

5.7.3	Alternative methods in cases where insulated hand tools have completed the production phase .....	40
5.8	Test of adhesion of exposed conductive parts at the working head of hybrid hand tools .....	41
5.8.1	Type test .....	41
5.8.2	Alternative methods in cases where hybrid hand tools have completed the production phase .....	41
5.9	Mechanical tests .....	41
5.9.1	Test of adhesion of insulating covers of conductive adjusting or switching elements .....	41
5.9.2	Insulated hand tools .....	42
5.9.3	Insulating and hybrid hand tools .....	42
5.9.4	Tweezers .....	43
5.9.5	Retaining force test for tools capable of being assembled.....	43
5.10	Durability of marking .....	46
5.11	Flame retardancy test .....	46
5.11.1	Type test .....	46
5.11.2	Alternative methods in cases where hand tools have completed the production phase .....	47
6	Conformity assessment of hand tools having completed the production phase.....	48
7	Modifications .....	48
Annex A (informative) Description and examples for insulated, hybrid and insulating hand tools.....		49
Annex B (informative) Mechanical strength of insulating and hybrid hand tools .....		50
B.1	Context.....	50
B.2	General.....	50
B.3	Insulating and hybrid screwdrivers .....	50
B.4	Insulating and hybrid spanners and ratchets .....	51
B.5	Insulating and hybrid T-spanners .....	51
B.6	Insulating and hybrid pliers and cable shears.....	51
Annex C (normative) Suitable for live working; double triangle (IEC 60417-5216:2002-10).....		52
Annex D (informative) Recommendation for use and in-service care.....		53
D.1	General.....	53
D.2	Storage.....	53
D.3	Inspection before use.....	53
D.4	Temperature .....	53
D.5	Periodic examination and electrical retesting .....	53
Annex E (normative) General type test procedure .....		54
Annex F (normative) Examples of calculation of the total linear length of insulation and acceptable leakage current (see 5.5.3.1.1).....		55
Annex G (normative) Classification of defects and tests to be allocated .....		56
Annex H (informative) Rationale for the classification of defects .....		57
Bibliography.....		59

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

**LIVE WORKING – HAND TOOLS FOR USE UP  
TO 1 000 V AC AND 1 500 V DC****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60900 has been prepared by IEC technical committee 78: Live working.

This fourth edition cancels and replaces the third edition, published in 2012. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) addition of a third category of tools has been added, namely *hybrid hand tools*;
- b) introduction of a new informative Annex A on examples of *insulated*, *insulating* and *hybrid hand tools*.

The text of this standard is based on the following documents:

FDIS	Report on voting
78/1221/FDIS	78/1229/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

Terms defined in Clause 3 are given in *italic* print throughout this document.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This document has been prepared in accordance with the requirements of IEC 61477 where applicable.

The products covered by this document may have an impact on the environment during some or all stages of its life cycle. These impacts can range from slight to significant, be of short-term or long-term duration, and occur at the global, regional or local level.

This document does not include requirements and test provisions for the manufacturers of the products, or recommendations to the users of the products for environmental improvement. However, all parties intervening in their design, manufacture, packaging, distribution, use, maintenance, repair, reuse, recovery and disposal are invited to take account of environmental considerations.

This document is a preview generated by EVS
