## **Introduction**

The aim of this document is to assess the attachment strength of buttons.

This document provides a reference method of test for compliance assessment. A document providing performance specification for infants' clothing is under development.

For the convenience of the clothing industry, a simplified method is provided in Annex B for routine in-house process control, however this does not replace the reference method.

This document has been developed from Annex B of CEN/TR 16792:2014.

This document is a preview generated by EVS

## 1 Scope
