-SUJUVKÄIVITID

Low-voltage switchgear and controlgear - Part 4-2:  
Contactors and motor-starters - Semiconductor motor  
controllers, starters and soft-starters

## EESTI STANDARDI EESSÕNA

## NATIONAL FOREWORD

See Eesti standard EVS-EN IEC 60947-4-2:2023 sisaldab Euroopa standardi EN IEC 60947-4-2:2023 ingliskeelset teksti.	This Estonian standard EVS-EN IEC 60947-4-2:2023 consists of the English text of the European standard EN IEC 60947-4-2:2023.
Standard on jõustunud sellekohase teate avaldamisega EVS Teatajas.	This standard has been endorsed with a notification published in the official bulletin of the Estonian Centre for Standardisation and Accreditation.
Euroopa standardimisorganisatsioonid on teinud Euroopa standardi rahvuslikele liikmetele kättesaadavaks 03.03.2023.	Date of Availability of the European standard is 03.03.2023.
Standard on kättesaadav Eesti Standardimis-ja Akrediteerimiskeskusest.	The standard is available from the Estonian Centre for Standardisation and Accreditation.

Tagasisidet standardi sisu kohta on võimalik edastada, kasutades EVS-i veebilehel asuvat tagasiside vormi või saates e-kirja meiliaadressile [standardiosakond@evs.ee](mailto:standardiosakond@evs.ee).

ICS 29.130.20

Standardite reprodutseerimise ja levitamise õigus kuulub Eesti Standardimis- ja Akrediteerimiskeskusele

Andmete paljundamine, taastekitamine, kopeerimine, salvestamine elektroonsesse süsteemi või edastamine ükskõik millises vormis või millisel teel ilma Eesti Standardimis- ja Akrediteerimiskeskuse kirjaliku loata on keelatud.

Kui Teil on küsimusi standardite autorikaitse kohta, võtke palun ühendust Eesti Standardimis- ja Akrediteerimiskeskusega: Koduleht [www.evs.ee](http://www.evs.ee); telefon 605 5050; e-post [info@evs.ee](mailto:info@evs.ee)

EUROPEAN STANDARD

**EN IEC 60947-4-2**

NORME EUROPÉENNE

EUROPÄISCHE NORM

March 2023

ICS 29.130.20

Supersedes EN 60947-4-2:2012

English Version

**Low-voltage switchgear and controlgear - Part 4-2: Contactors  
and motor-starters - Semiconductor motor controllers, starters  
and soft-starters  
(IEC 60947-4-2:2020)**

Appareillage à basse tension - Partie 4-2: Contacteurs et  
démarreurs de moteurs - Gradateurs, démarreurs et  
démarreurs progressifs à semiconducteurs de moteurs  
(IEC 60947-4-2:2020)

Niederspannungsschaltgeräte - Teil 4-2: Schütze und  
Motorstarter - Halbleiter-Motor-Steuergeräte, Starter und  
Sanftstarter  
(IEC 60947-4-2:2020)

This European Standard was approved by CENELEC on 2023-01-11. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

## European foreword

The text of document 121A/353/FDIS, future edition 4 of IEC 60947-4-2, prepared by SC 121A "Low-voltage switchgear and controlgear" of IEC/TC 121 "Switchgear and controlgear and their assemblies for low voltage" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 60947-4-2:2023.

The following dates are fixed:

- latest date by which the document has to be implemented at national (dop) 2023-10-11 level by publication of an identical national standard or by endorsement
- latest date by which the national standards conflicting with the (dow) 2026-01-11 document have to be withdrawn

This document supersedes EN 60947-4-2:2012 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a Standardization Request given to CENELEC by the European Commission and the European Free Trade Association.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

## Endorsement notice

The text of the International Standard IEC 60947-4-2:2020 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standard indicated:

IEC 60034-30-1	NOTE Approved as EN 60034-30-1
IEC 60068-2-2:2007	NOTE Approved as EN 60068-2-2:2007 (not modified)
IEC 60079 (series)	NOTE Approved as EN IEC 60079-7 (series)
IEC 60085:2007	NOTE Approved as EN 60085:2008 (not modified)
IEC 60269-1:2006	NOTE Approved as EN 60269-1:2007 (not modified)
IEC 60364-1	NOTE Approved as HD 60364-1
IEC 60664 (series)	NOTE Approved as EN 60664 (series)
IEC 60947-2	NOTE Approved as EN 60947-2
IEC 60947-3	NOTE Approved as EN IEC 60947-3
IEC 60947-4-1	NOTE Approved as EN IEC 60947-4-1
IEC 60947-4-3	NOTE Approved as EN 60947-4-3

IEC 60990:2016 NOTE Approved as EN 60990:2016 (not modified)  
IEC 61000-4 (series) NOTE Approved as EN 61000-4 (series)  
IEC 61032 NOTE Approved as EN 61032  
IEC 61800 (series) NOTE Approved as EN 61800 (series)

### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

#### Glossaire IEC - [std.iec.ch/glossary](http://std.iec.ch/glossary)

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

FOREWORD.....	7
INTRODUCTION.....	9
1 Scope.....	10
2 Normative references .....	11
3 Terms, definitions, symbols and abbreviated terms.....	12
3.1 Terms and definitions.....	12
3.1.1 Terms and definitions concerning the types of semiconductor motor controllers and starters .....	12
3.1.2 Terms and definitions concerning semiconductor motor controllers and starters .....	14
3.1.3 Terms and definitions concerning safety aspects .....	17
3.1.4 Alphabetical index of terms.....	18
3.2 Symbols and abbreviated terms .....	20
4 Classification.....	20
5 Characteristics of semiconductor motor controllers and starters .....	20
5.1 Summary of characteristics.....	20
5.2 Type of equipment .....	21
5.2.1 Kind of equipment.....	21
5.2.2 Number of poles .....	21
5.2.3 Kind of current.....	21
5.2.4 Interrupting medium (air, vacuum, etc.).....	21
5.2.5 Operating conditions of the equipment.....	21
5.3 Rated and limiting values for main circuits .....	22
5.3.1 Rated voltages.....	22
5.3.2 Currents.....	24
5.3.3 Rated frequency .....	25
5.3.4 Duty cycle values and sequences .....	25
5.3.5 Normal load and overload characteristics.....	25
5.3.6 Rated conditional short-circuit current.....	27
5.3.7 Semiconductor motor controller power losses .....	27
5.4 Utilization category .....	28
5.4.1 General.....	28
5.4.2 Assignment of ratings based on the results of tests .....	28
5.5 Control circuits.....	29
5.6 Auxiliary circuits.....	29
5.7 Characteristics of relays and releases (overload relays).....	29
5.7.1 Summary of characteristics.....	29
5.7.2 Types of relay or release .....	30
5.7.3 Characteristic values .....	30
5.7.4 Designation and current settings of overload relays .....	31
5.7.5 Time-current characteristics of overload relays .....	31
5.7.6 Influence of ambient air temperature.....	32
5.8 Coordination with short-circuit protective devices (SCPD).....	32
6 Product information .....	32
6.1 Nature of information .....	32
6.2 Marking.....	34

6.3	Instructions for installation, operation, maintenance, decommissioning and dismantling .....	34
6.4	Environmental information .....	34
7	Normal service, mounting and transport conditions .....	35
7.1	Normal service conditions .....	35
7.1.1	Ambient air temperature .....	35
7.1.2	Altitude .....	35
7.1.3	Atmospheric conditions .....	35
7.1.4	Shock and vibrations .....	35
7.2	Conditions during transport and storage .....	35
7.3	Mounting .....	35
7.4	Electrical system disturbances and influences .....	35
8	Constructional and performance requirements .....	36
8.1	Constructional requirements .....	36
8.1.1	General .....	36
8.1.2	Materials .....	36
8.1.3	Current-carrying parts and their connections .....	37
8.1.4	Clearances and creepage distances .....	37
8.1.5	Actuator .....	37
8.1.6	Indication of the contact position .....	37
8.1.7	Additional requirements for equipment suitable for isolation .....	37
8.1.8	Terminals .....	37
8.1.9	Additional requirements for equipment provided with a neutral pole .....	38
8.1.10	Provisions for protective earthing .....	38
8.1.11	Enclosures for equipment .....	38
8.1.12	Degrees of protection of enclosed equipment .....	38
8.1.13	Conduit pull-out, torque and bending with metallic conduits .....	38
8.1.14	Limited energy source .....	38
8.1.15	Stored charge energy circuit .....	40
8.1.16	Fault and abnormal conditions .....	40
8.1.17	Short-circuit and overload protection of ports .....	41
8.2	Performance requirements .....	41
8.2.1	Operating conditions .....	41
8.2.2	Temperature-rise .....	46
8.2.3	Dielectric properties .....	47
8.2.4	Normal load and overload performance requirements .....	48
8.2.5	Coordination with short-circuit protective devices .....	53
8.3	EMC requirements .....	54
8.3.1	General .....	54
8.3.2	Immunity .....	54
8.3.3	Emission .....	56
9	Tests .....	56
9.1	Kinds of tests .....	56
9.1.1	General .....	56
9.1.2	Type tests .....	56
9.1.3	Routine tests .....	57
9.1.4	Sampling tests .....	57
9.1.5	Special tests .....	57
9.2	Compliance with constructional requirements .....	58

9.2.1	General.....	58
9.2.2	Electrical performance of screwless-type clamping units.....	58
9.2.3	Ageing test for screwless-type clamping units.....	59
9.2.4	Limited energy source test.....	59
9.2.5	Breakdown of components.....	59
9.2.6	Wire flexing test.....	60
9.3	Compliance with performance requirements.....	60
9.3.1	Test sequences.....	60
9.3.2	General test conditions.....	61
9.3.3	Performance under no load, normal load, and overload conditions.....	61
9.3.4	Performance under short-circuit conditions.....	72
9.4	EMC tests.....	75
9.4.1	General.....	75
9.4.2	EMC immunity tests.....	76
9.4.3	EMC emission tests.....	76
9.5	Routine and sampling tests.....	79

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**LOW-VOLTAGE SWITCHGEAR AND CONTROLGEAR –****Part 4-2: Contactors and motor-starters –  
Semiconductor motor controllers, starters and soft-starters**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60947-4-2 has been prepared by subcommittee 121A: Low-voltage switchgear and controlgear, of IEC technical committee 121: Switchgear and controlgear and their assemblies for low voltage.

This fourth edition cancels and replaces the third edition published in 2011. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- scope exclusions;
- editorial correction of notes and hanging paragraphs;
- reference to IEC 62683-1;

- safety aspects related to:
  - general aspects;
  - limited energy circuits;
  - electronic circuits;
- mention of dedicated wiring accessories;
- power consumption measurement;
- alignment to IEC 60947-1:2020.

The provisions of the general rules dealt with IEC 60947-1 are applicable to this part of IEC 60947 series where specifically called for. Clauses and subclauses, tables, figures and annexes of the general rules thus applicable are identified by reference to IEC 60947-1:2020.

The text of this standard is based on the following documents:

FDIS	Report on voting
121A/353/FDIS	121A/360/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 60947 series, under the general title *Low-voltage switchgear and controlgear*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## INTRODUCTION

This document covers low-voltage semiconductor motor controllers, starters and soft-starters that have many capabilities and features beyond the simple starting and stopping of an induction motor, such as controlled starting and stopping, manoeuvring and controlled running.

The generic term “controller” is used in this document wherever reference is made to elements of power semiconductor switching devices.

The generic term “starter” is used in this document wherever reference is made to the elements of power semiconductor switching devices together with suitable overload protective devices.

This document is a preview generated by EVS

## LOW-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

### Part 4-2: Contactors and motor-starters – Semiconductor motor controllers, starters and soft-starters

#### 1 Scope

This part of IEC 60947 applies to semiconductor motor controllers, starters and soft-starters which can include a series mechanical switching device, intended to be connected to circuits the rated voltage of which does not exceed 1 000 V AC.

This document characterizes semiconductor motor controllers and starters with and without bypass means.

This document does not apply to:

- semiconductor motor controllers and starters used for continuous operation of AC motors at motor speeds other than the normal speed<sup>1</sup>;
- electromechanical contactors and external overload relays (see IEC 60947-4-1);
- short-circuit protective device associated with semiconductor motor controllers and starters (see IEC 60947-4-1 (MPSD), IEC 60947-2 and IEC 60947-3);
- semiconductor equipment, including semiconductor contactors (3.4.13 of IEC 60947-1:2020) controlling non-motor loads (see IEC 60947-4-3);
- semiconductor motor controllers and starters used for rotor circuits<sup>1</sup>;
- adjustable speed electrical power drive systems (see IEC 61800 series);
- use of the product within explosive atmospheres (see IEC 60079 series);
- software and firmware requirements<sup>1</sup>;

NOTE 1 Guidance on embedded software is given in IEC TR 63201.

- cyber security aspects (see IEC TS 63208).

Contactors, overload relays and control circuit devices used in semiconductor motor controllers and starters are considered compliant with the requirements of their relevant product standard. Where mechanical switching devices are used, they are considered meeting the requirements of their own IEC product standard, and the additional requirements of this document.

The object of this document is to state as follows:

- the characteristics of semiconductor motor controllers, starters and soft-starters and associated equipment;
- the conditions with which semiconductor motor controllers, starters and soft-starters comply with reference to
  - a) their operation and behaviour in normal and abnormal operating conditions including overcurrent operating conditions;
  - b) their dielectric properties;
  - c) the degrees of protection provided by their enclosures where applicable;

---

<sup>1</sup> For this subject, the manufacturer is responsible for taking additional safety measures.

- d) their construction including safety measures against electric shock, fire hazard and mechanical hazard;
- the tests intended for confirming that these conditions have been met, and the methods to be adopted for these tests;
- the information to be given with the equipment, or in the manufacturer's literature.

NOTE 2 For the purpose of this document, the term "controller" is used instead of "semiconductor motor controller".

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
