EUROPEAN STANDARD

**EN IEC 60730-1**

NORME EUROPÉENNE

EUROPÄISCHE NORM

October 2024

ICS 97.120

Supersedes EN 60730-1:2016; EN 60730-1:2016/A1:2019; EN 60730-1:2016/A2:2022; EN 60730-1:2016/prAA:2022

English Version

## Automatic electrical controls - Part 1: General requirements (IEC 60730-1:2022)

Dispositifs de commande électrique automatiques -  
Partie 1: Exigences générales  
(IEC 60730-1:2022)

Automatische elektrische Regel- und Steuergeräte - Teil 1:  
Allgemeine Anforderungen  
(IEC 60730-1:2022)

This European Standard was approved by CENELEC on 2024-01-31. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

## European foreword

The text of document 72/1307/FDIS, future edition 6 of IEC 60730-1, prepared by IEC/TC 72 "Automatic electrical controls" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 60730-1:2024.

The following dates are fixed:

- latest date by which the document has to be implemented at national (dop) 2025-04-25 level by publication of an identical national standard or by endorsement
- latest date by which the national standards conflicting with the (dow) – document have to be withdrawn

This document supersedes EN 60730-1:2016 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a standardization request addressed to CENELEC by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

## Endorsement notice

The text of the International Standard IEC 60730-1:2022 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standard indicated:

IEC 60990:2016	NOTE	Approved as EN 60990:2016 (not modified)
IEC 60243-1	NOTE	Approved as EN 60243-1
IEC 60669-1	NOTE	Approved as EN 60669-1
IEC 60730-2-5	NOTE	Approved as EN 60730-2-5
IEC 60998-2-1	NOTE	Approved as EN 60998-2-1
IEC 61000-6-7:2014	NOTE	Approved as EN 61000-6-7:2015 (not modified)
IEC 61032:1997	NOTE	Approved as EN 61032:1998 (not modified)
IEC 61058-1-1	NOTE	Approved as EN 61058-1-1
IEC 61140:2016	NOTE	Approved as EN 61140:2016 (not modified)
IEC 61508-3:2010	NOTE	Approved as EN 61508-3:2010 (not modified)
IEC 61508-7:2010	NOTE	Approved as EN 61508-7:2010 (not modified)

IEC 61810-1	NOTE	Approved as EN 61810-1
IEC 63044-3	NOTE	Approved as EN IEC 63044-3
IEC 63044-5-1:2017	NOTE	Approved as EN IEC 63044-5-1:2019 (not modified)
ISO 62:2008	NOTE	Approved as EN ISO 62:2008 (not modified)
ISO 75-1	NOTE	Approved as EN ISO 75-1
ISO 178:2019	NOTE	Approved as EN ISO 178:2019 (not modified)
ISO 527-1:2019	NOTE	Approved as EN ISO 527-1:2019 (not modified)
ISO 16484-2	NOTE	Approved as EN ISO 16484-2

### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC -

##### [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

## CONTENTS

FOREWORD .....	10
1 Scope .....	14
2 Normative references .....	15
3 Terms and definitions .....	19
3.1 Definitions relating to ratings, voltages, currents, frequencies, and wattages .....	19
3.2 Definitions of types of control according to purpose .....	21
3.3 Definitions relating to the function of controls .....	24
3.4 Definitions relating to disconnection and interruption .....	27
3.5 Definitions of types of control according to construction .....	28
3.6 Definitions of type of automatic action of a control .....	29
3.7 Definitions relating to protection against electric shock and type of insulation .....	30
3.8 Definitions relating to component parts of controls .....	34
3.9 Definitions of types of terminals and terminations of controls .....	35
3.10 Definitions relating to the connections to controls .....	37
3.11 Definitions relating to the performance of type 2 actions .....	38
3.12 Definitions relating to the requirements for creepage distances and clearances .....	38
3.13 Miscellaneous definitions .....	39
3.14 Definitions relating to manufacturer and user .....	41
3.15 Definitions pertaining to thermistors .....	41
3.16 Definitions relating to the structure of controls using software .....	41
3.17 Definitions relating to error avoidance in controls using software .....	41
3.18 Definitions relating to fault/error control techniques for controls using software .....	41
3.19 Definitions relating to memory tests for controls using software .....	41
3.20 Definitions of software terminology – General .....	41
3.21 Definitions relating to classes of control functions .....	41
3.22 Definitions relating to functional safety .....	41
3.23 Definitions related to access to data exchange .....	42
3.24 Definitions related to EMC performance .....	42
4 General .....	44
4.1 General structure of the document .....	44
4.2 General requirements .....	45
4.3 General notes on tests .....	45
5 Required technical information .....	49
5.1 General requirements .....	49
5.2 Methods of providing technical information .....	49
5.3 Class II symbol .....	57
5.4 Additional requirements for marking .....	57
5.5 Warning or cautionary markings .....	59
6 Protection against electric shock .....	59
6.1 General requirements .....	59
6.2 Actuating members and actuating means .....	61
6.3 Capacitors .....	62
6.4 Covers and uninsulated live or hazardous parts .....	62

6.5	Battery operated controls provided with a user accessible mains supply input connector .....	62
7	Provision for protective earthing .....	63
7.1	Class 0I and Class I controls .....	63
7.2	Class II and class III controls .....	63
7.3	Adequacy of earth connections .....	63
7.4	Corrosion resistance .....	64
7.5	Other requirements .....	65
7.6	Protective equipotential bonding .....	65
8	Terminals and terminations .....	65
8.1	Terminals and terminations for external copper conductors .....	65
8.2	Terminals and terminations for internal conductors .....	70
8.3	Terminals and terminations for integrated conductors .....	72
9	Constructional requirements .....	72
9.1	Materials .....	72
9.2	Protection against electric shock .....	72
9.3	Actuation and operation .....	75
9.4	Actions .....	78
9.5	Openings in enclosures .....	80
9.6	Mounting of controls .....	80
9.7	Attachment of cords .....	82
9.8	Size of cords – non-detachable .....	83
9.9	Inlet openings .....	83
9.10	Equipment inlets and socket-outlets .....	84
9.11	Requirements during mounting, use, maintenance and servicing .....	85
9.12	Controls using software .....	87
9.13	Protective controls and components of protective control systems .....	90
10	Threaded parts and connections .....	92
10.1	Threaded parts moved during mounting or servicing .....	92
10.2	Current-carrying connections and connections providing protective earthing continuity .....	94
11	Creepage distances, clearances and distances through solid insulation .....	95
11.1	General .....	95
11.2	Clearances .....	96
11.3	Creepage distances .....	100
11.4	Solid insulation .....	104
12	Components .....	105
12.1	Transformers .....	105
12.2	Switch mode power supplies and converters .....	105
12.3	Capacitors .....	106
12.4	Fuses .....	106
12.5	Varistors .....	106
12.6	Thermistors .....	106
12.7	Relays .....	107
12.8	Other components .....	107
13	Fault assessment on electronic circuits .....	107
13.1	Fault assessment for inherent safety .....	107
13.2	Fault assessment to ensure functional safety .....	113

14	Moisture and dust resistance .....	113
14.1	Protection against ingress of water and dust .....	113
14.2	Protection against humid conditions .....	114
14.3	Touch current test for in-line cord controls and free-standing controls .....	115
15	Electric strength and insulation resistance .....	116
15.1	Insulation resistance .....	116
15.2	Electric strength .....	116
15.3	Additional tests for in-line cord and free-standing controls .....	118
16	Heating .....	119
17	Manufacturing deviation and drift .....	123
18	Environmental stress .....	123
18.1	Transportation and storage .....	123
18.2	Environmental stress of temperature .....	123
19	Endurance .....	124
19.1	General requirements .....	124
19.2	Electrical conditions for the tests .....	125
19.3	Thermal conditions for the tests .....	131
19.4	Manual and mechanical conditions for the tests .....	131
19.5	Dielectric strength requirements .....	132
19.6	Ageing test .....	132
19.7	Overvoltage test or overload test in all countries using an overload test of automatic action at accelerated rate .....	132
19.8	Test of automatic action at accelerated rate .....	133
19.9	Test of automatic action at slow rate .....	133
19.10	Overvoltage test or overload test in all countries that use the overload test of manual action at accelerated speed .....	134
19.11	Test of manual action at slow speed .....	134
19.12	Test of manual action at high speed which has multiple poles, and where polarity reversal occurs during the action .....	134
19.13	Test of manual action at accelerated speed .....	134
19.14	Evaluation of compliance .....	135
19.15	Test for particular purpose controls .....	135
20	Mechanical strength .....	135
20.1	General requirements .....	135
20.2	Impact resistance .....	136
20.3	Free-standing controls .....	137
20.4	In-line cord controls .....	137
20.5	Pull-cord actuated controls .....	137
20.6	Foot actuated controls .....	138
20.7	Actuating member and actuating means .....	138
20.8	Flexing – test .....	139
20.9	Cord anchorages – test .....	139
21	Resistance to heat, fire and tracking .....	140
21.1	General requirements .....	140
21.2	Integrated, incorporated and in-line cord controls .....	140
21.3	Independently mounted, free-standing controls .....	141
22	Resistance to corrosion .....	142
22.1	Resistance to rusting .....	142

23	Electromagnetic compatibility (EMC) requirements – Emission .....	142
23.1	General requirement .....	142
23.2	High frequency emission .....	143
23.3	Low frequency emission .....	146
24	Normal operation .....	146
25	Electromagnetic compatibility (EMC) requirements – Immunity .....	146
25.1	General .....	146
25.2	EMC test plan and report .....	147
25.3	Immunity requirements .....	149
25.4	Performance criteria .....	152
25.5	Surge immunity test .....	153
25.6	Electrical fast transient immunity test .....	153
25.7	Radio-frequency electromagnetic field immunity .....	154
25.8	Electrostatic discharge .....	154
25.9	Immunity to power-frequency magnetic fields .....	154
25.10	Test of the influence of voltage dips and voltage interruption in the power supply network .....	154
26	Abnormal operation tests .....	155
26.1	Abnormal temperature test .....	155
26.2	Overload tests .....	156
26.3	Battery short-circuit test .....	157
Annex A	(normative) Indelibility of markings .....	174
Annex B	(normative) Measurement of creepage distances and clearances in air .....	176
Annex C	(informative) Nominal voltages of supply systems for different modes of overvoltage control .....	180
Annex D	(normative) Overvoltage categories .....	182
Annex E	(informative) Typical usage of controls and related overvoltage categories .....	183
Annex F	(normative) Pollution degrees .....	184
F.1	Pollution .....	184
F.2	Degrees of pollution in the micro-environment .....	184
Annex G	(normative) Resistance to heat, fire and tracking tests .....	185
G.1	Glow-wire test .....	185
G.2	Proof tracking test .....	185
G.3	Ball pressure test .....	185
Annex H	(normative) Requirements related to functional safety .....	187
H.3	Terms and definitions .....	187
H.5	Information .....	198
H.9	Constructional requirements .....	199
H.13	Fault assessment on electronic circuits .....	216
H.17	Manufacturing deviation and drift .....	220
H.19	Endurance .....	221
H.25	Electromagnetic compatibility (EMC) requirements – Immunity .....	222
Annex I	(normative) Requirements for certain types of DC supplied controls .....	235
I.1	Scope .....	235
Annex J	(normative) Requirements for thermistor elements and controls using thermistors .....	237
J.1	Scope .....	237
Annex K	(normative) Circuit for measuring touch current .....	254

Annex L (normative) Printed circuit board coating performance test .....	255
Annex M (normative) Printed circuit board protection .....	257
Annex N (informative) Explanatory notes for surge immunity test .....	260
N.1 Different source impedances .....	260
N.2 Application of the tests .....	260
N.3 Installation classification .....	261
Annex O (informative) Guidance for applying Clause 11 .....	264
Annex P (normative) Requirements for SELV and PELV .....	267
P.1 Overview of the requirements for SELV and PELV .....	267
P.2 Protection against electric shock by SELV system or PELV system .....	267
P.3 Protective measures for SELV system and PELV system .....	268
Annex Q (informative) Regional differences relevant for the member countries of Cenelec .....	270
Annex R (informative) National differences relevant in the United States of America .....	274
R.2 Normative references .....	274
Annex S (informative) National differences relevant in Japan .....	275
S.2 Normative references .....	275
Annex T (informative) National differences relevant in Canada .....	276
T.2 Normative references .....	276

# INTERNATIONAL ELECTROTECHNICAL COMMISSION

## AUTOMATIC ELECTRICAL CONTROLS –

### Part 1: General requirements

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60730-1 has been prepared by IEC technical committee 72: Automatic electrical controls. It is an International Standard.

This sixth edition cancels and replaces the fifth edition published in 2013, Amendment 1:2015 and Amendment 2:2020. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- |    |   |   |
|----|---|---|
| a) | Structure of the main clauses           | <p>The clauses of the standard are grouped into two sections of requirements, where</p> <ul style="list-style-type: none"> <li>• the first section consists of the Clauses 5 to 13 that, in general, addresses the construction of the product. It is noted that certain construction requirements may have verification requirements integrated within the clause to facilitate usage of the standard, and</li> <li>• the second section consists of Clauses 14 to 26 that addresses the verification requirements;</li> </ul> |
| b) | Scope                                   | Relocated and deleted clauses to better reflect the products covered under the part 1 and for easier reading;   |
| c) | Normative references                    | Updated references;   |
| d) | Terms and definitions                   | Revised text in certain clauses and relocated relevant Clause H.3 subclauses into Clause 3;   |
| e) | General requirements                    | General structure of the standard explained along with a figure to depict the intent;   |
| f) | General notes on tests                  | Reduced sample size from 3 to 1, yet requiring analysis; order of tests more flexible; relocation of battery requirements from Annex V;   |
| g) | Rating                                  | Deleted – covered under the scope;  |
| h) | Classification                          | Deleted – covered under information;  |
| i) | Information                             | Updated Table 1 to reflect entries from the classification clause, and all cross-references;  |
| j) | Protection against electric shock       | Revised Clause 8 to include Clause H.8 and Clause V.8 subclauses, revised clauses as appropriate to distinguish between a live part and a hazardous live part;  |
| k) | Provision for protective earthing       |   |
| l) | Construction requirements               | One Y1 capacitor allowed; relocated relevant requirements of Clause H.11 and Clause V.11 into Subclause 9.2.5 and Subclause 9.13.4.4 respectively;  |
| m) | Moisture and dust                       | Relocated IP table from classification to Clause 14; updated references;  |
| n) | Manufacturing deviation and drift       | All clauses moved to Annex H since the requirements pertain to functional safety of controls;   |
| o) | EMC-Emissions                           | Moved Clause H.23 into Clause 23;   |
| p) | EMC-Immunity                            | New EMC requirements (performance) for all controls except incorporated/integrated controls with Class A control functions. Products intended for HBES/BACS are also subjected to these requirements;   |
| q) | Fault assessment on electronic circuits | Fault assessment moved from Annex H to Clause 13; deleted test abnormal voltage for electronic disconnection;   |

- r) Annex H Relocated all relevant requirements for electronics to the respective clauses within the body of the standard and retained requirements related to functional safety in this annex;
- s) Annex T Revised clauses for clarity in Annex P;
- t) Annex U Removed, the necessity of the annex was not seen anymore;
- u) Annex V Included in the main part of the standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
72/1307/FDIS	72/1320/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at <https://www.iec.ch/publications>.

A list of all parts of the IEC 60730 series, under the general title: *Automatic electrical controls*, can be found on the IEC website.

In the development of a fully international standard to cover automatic electrical controls, it has been necessary to take into consideration the differing requirements resulting from practical experience in various parts of the world and to recognize the variation in national electrical systems and wiring rules.

The "in some countries" clauses have been moved to the regional respectively national differences in Annex Q to Annex T.

It is envisaged that in the next edition of this document, it will be found possible to remove those differences that are covered by new IEC standards now being prepared by other technical committees.

This part 1 is to be used in conjunction with the appropriate part 2 for a particular type of control, or for controls for particular applications. This part 1 may also be applied, so far as reasonable, to controls not mentioned in a part 2, and to controls designed on new principles, in which cases additional requirements may be considered to be necessary.

Where, for a particular clause or subclause, the text of part 2 indicates:

- Addition:** the part 1 text applies with the additional requirement indicated in a part 2;
- Modification:** the part 1 text applies with a minor change as indicated in a part 2;
- Replacement:** the part 2 text contains a change which replaces the part 1 text in its entirety.

Where no change is necessary, the part 2 indicates that the relevant clause or subclause applies.

NOTE In this document the following print types are used:

- Requirements proper: in roman type;
- *Test specifications: in italic type;*
- Explanatory matter: in smaller roman type;
- Defined terms: **bold type**.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

This document is a preview generated by EVS

## AUTOMATIC ELECTRICAL CONTROLS –

### Part 1: General requirements

#### 1 Scope

This document applies to automatic electrical controls

- for use in, on, or in association with equipment for household appliance and similar use;

NOTE 1 Throughout this document, the word "equipment" means "appliance and equipment".

- for building automation within the scope of ISO 16484 series and IEC 63044 series (HBES/BACS);

EXAMPLE 1 Independently mounted water valves, controls in smart grid systems and controls for building automation systems within the scope of ISO 16484-2.

- for equipment that is used by the public, such as equipment intended to be used in shops, offices, hospitals, farms and commercial and industrial applications;

EXAMPLE 2 Controls for commercial catering, heating and air-conditioning equipment.

- that are **smart enabled controls**;

EXAMPLE 3 Smart grid control, remote interfaces/control of energy-consuming equipment including computer or smart phone.

- that are AC or DC powered controls with a rated voltage not exceeding 690 V AC or 600 V DC where the DC source is provided by primary or secondary batteries;
- used in, on, or in association with equipment that use electricity, gas, oil, solid fuel, solar thermal energy, etc., or a combination thereof;
- utilized as part of a control system or controls which are mechanically integral with multifunctional controls having non-electrical outputs;
- using NTC or **PTC thermistors** and to discrete **thermistors**, requirements for which are contained in Annex J;
- that are mechanically or electrically operated, responsive to or controlling such characteristics as temperature, pressure, passage of time, humidity, light, electrostatic effects, flow, or liquid level, current, voltage, acceleration, or combinations thereof;
- as well as manual controls when such are electrically and/or mechanically integral with automatic controls.

NOTE 2 Requirements for manually actuated mechanical switches not forming part of an automatic control are contained in IEC 61058-1-1.

This document applies to

- the inherent safety of automatic electrical controls, and
- functional safety of automatic electrical controls and safety related systems,
- controls where the performance (for example the effect of EMC phenomena) of the product can impair the overall safety and performance of the controlled system,
- the operating values, operating times, and operating sequences where such are associated with equipment safety.

This document specifies the requirements for construction, operation and testing of automatic electrical controls used in, on, or in association with an equipment.

This document does not

- apply to automatic **electronic controls** intended exclusively for industrial process applications unless explicitly mentioned in the relevant part 2 or the equipment standard. However, this document can be applied to evaluate automatic electrical controls intended specifically for industrial applications in cases where no relevant safety standard exists.
- take into account the response value of an automatic action of a control, if such a response value is dependent upon the method of mounting the control in the equipment. Where a response value is of significant purpose for the protection of the user, or surroundings, the value defined in the appropriate equipment standard or as determined by the manufacturer will apply.
- address the integrity of the output signal to the network devices, such as interoperability with other devices unless it has been evaluated as part of the control system.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 7637-3:2016, *Road vehicles – Electrical disturbances from conduction and coupling – Part 3: Electrical transient transmission by capacitive and inductive coupling via lines other than supply lines*

ISO 16484 (all parts), *Building automation and control systems (BACS)*

### 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

NOTE Where the terms "voltage" and "current" are used, they imply the RMS values, unless otherwise specified.

#### 3.1 Definitions relating to ratings, voltages, currents, frequencies, and wattages

##### 3.1.1

##### **rated voltage, current, frequency or wattage**

voltage, current, frequency or wattage assigned to a **control** by the manufacturer

Note 1 to entry: For three phase supply, the **rated voltage** is the line-to-line voltage.

##### 3.1.2

##### **rated voltage, current, frequency or wattage range**

voltage, current, frequency or wattage ranges assigned to the **control** by the manufacturer and expressed by lower and upper values

##### 3.1.3

##### **working voltage**

highest RMS value of the AC or DC voltage across any particular insulation which can occur when the equipment is supplied at **rated voltage**

Note 1 to entry: **Transient overvoltages** are disregarded.

Note 2 to entry: Open-circuit conditions and normal operating conditions are taken into account.
