This European Standard was approved by CEN on 2 April 2018. Amendment A1 was approved by CEN on 2 September 2024.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard and its amendment the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard and its Amendment A1 exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN ISO 41001:2018) has been prepared by Technical Committee ISO/TC 267 “Facility management” in collaboration with Technical Committee CEN/TC 348 “Facility Management” the secretariat of which is held by NEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2018, and conflicting national standards shall be withdrawn at the latest by November 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 41001:2018 has been approved by CEN as EN ISO 41001:2018 without any modification.

A1 Amendment A1 European foreword

The text of ISO 41001:2018/Amd 1:2024 has been prepared by Technical Committee ISO/TC 267 "Facility management" of the International Organization for Standardization (ISO) and has been taken over as EN ISO 41001:2018/A1:2024 by Technical Committee CEN/TC 348 "Facility Management" the secretariat of which is held by SN.

This Amendment to the European Standard EN ISO 41001:2018 shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2025, and conflicting national standards shall be withdrawn at the latest by March 2025.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Endorsement notice

The text of ISO 41001:2018/Amd 1:2024 has been approved by CEN as EN ISO 41001:2018/A1:2024 without any modification. **A1**

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 267, *Facility management*.

A1 Amendment A1 Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 267, *Facility management*, in accordance with Technical Management Board Resolution 75/2023.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html. **A1**

Introduction

0.1 General

Facility management (FM) integrates multiple disciplines in order to have an influence on the efficiency and productivity of economies of societies, communities and organizations, as well as the manner in which individuals interact with the built environment. FM affects the health, well-being and quality of life of much of the world's societies and population through the services it manages and delivers.

While FM has such a broad impact, recognition of its principles and practices at a global level has been lacking. This document provides the basis for a common interpretation and understanding of FM and the ways in which it can benefit organizations of all kinds.

The development of the market for FM services would be enhanced by the presence of a common global structure and supporting standard. The sector benefits from a common basis upon which FM can be assessed and measured. This is the primary driver for, and purpose of, this document.

In a globally-competitive environment, FM organizations and providers need to communicate among themselves and with interested parties using common principles, concepts and terms, including assessment and measurement of performance. This document is intended to raise the standard of care and increase levels of quality, thereby stimulating organizational maturity and competition for the delivery of FM.

The benefits of an integrated system standard for FM include:

- improved workforce productivity, safety and health and well-being;
- improved communication of requirements and methodologies among and between public and private sector organizations;
- improved efficiency and effectiveness, thus improving cost benefits to organizations;
- improved service consistency;
- providing a common platform for all types of organizations.

This document is applicable to any organization that wishes to:

- establish, implement, maintain and improve an integrated FM system;
- assure itself of conformity with its stated management policy;
- demonstrate conformity with this document by:
 - making a self-determination and self-declaration;
 - seeking confirmation of its conformity by parties having an interest in the organization;
 - seeking confirmation of its self-declaration by a party external to the organization;
 - seeking certification/registration of its FM system by an accredited third-party certification body.

0.2 Process approach

This document applies the framework developed by ISO to improve alignment among its International Standards for management systems.

This document promotes the adoption of a process approach when developing, implementing and improving the effectiveness of a management system standard to enhance customer satisfaction by meeting their requirements.

For an organization to function effectively, it needs to determine and manage numerous interrelated activities. An activity, or set of activities, using resources and managed in order to enable the transformation of inputs into outputs, can be considered as a process. Generally, the output from one process directly forms the input to the next.

The application of a system of processes within an organization, together with the identification, interactions of these processes and their management to produce the desired outcome, can be referred to as the “process approach”.

An advantage of the process approach is the ongoing control that it provides over the linkage between the individual processes within the system of processes, as well as over their combination and interaction.

When used within an FM system, such an approach emphasizes the importance of:

- a) understanding and meeting the demand organization’s requirements through an integrated planning process;

NOTE A demand organization is an entity which has a need and the authority to incur costs to have requirements met. It is typically an authorized representative within a functional unit of the organization.

- b) the relationship between the integrated planning process and Clauses 4 to 10 of the FM system;
- c) the documentation associated with the requirements of the FM system and the subject of certification assessments;
- d) all of the above in the context of management levels;
- e) continual improvement of processes based on objective measurement.

To preview the FM system, the core processes start with understanding and defining the following criteria within a demand organization.

- **Context of the organization:** understanding and determining the appropriate FM system (see Clause 4).
- **Leadership:** understanding organizational roles, responsibilities, policies and authorities (see Clause 5).
- **Planning:** understanding risks, strategic objectives and current policies (see Clause 6).
- **Support:** understanding available versus required resources in the form of financial, human and technology (see Clause 7).
- **Operations:** delivering integrated FM services (see Clause 8).
- **Performance evaluation:** benchmarking standards, monitoring and meeting target requirements (see Clause 9).
- **Improvement:** reviewing benchmarked standards, identifying and implementing process improvement initiatives (see Clause 10).

Reference is made to the demand organization and the organization throughout this document. This distinction is made due to the variable nature in which FM services may be delivered through internal staffing within the demand organization, external service providers, or a combination of the two. The requirements of this document apply to the FM organization. However, as illustrated in Figure 1, the FM organization and the demand organization need to work together to clearly define needs to meet the core business strategy, and to develop FM policies and practices that will enable the core business activities of the demand organization. The organization (and top management) refers to the FM organization throughout, unless otherwise noted as the demand organization.

In addition, the clauses of this document can be considered through the process approach methodology known as “Plan-Do-Check-Act” (PDCA), as is illustrated in Figure 1. PDCA can be briefly described as follows.

Plan: establish the objectives and processes necessary to deliver results in accordance with customer requirements and the organization’s policies.

Do: implement the processes.

Check: monitor and measure processes and product against policies, objectives and requirements for the product and report the results.

Act: take actions to continually improve process performance.

Figure 1 — Process approach methodology in facility management

This document is a preview generated by EVS

Facility management — Management systems — Requirements with guidance for use

1 Scope

This document specifies the requirements for a facility management (FM) system when an organization:

- a) needs to demonstrate effective and efficient delivery of FM that supports the objectives of the demand organization;
- b) aims to consistently meet the needs of interested parties and applicable requirements;
- c) aims to be sustainable in a globally-competitive environment.

The requirements specified in this document are non-sector specific and intended to be applicable to all organizations, or parts thereof, whether public or private sector, and regardless of the type, size and nature of the organization or geographical location.

Annex A provides additional guidance on the use of this document.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 41011, *Facility management — Vocabulary*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 41011 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>

NOTE 1 For the purposes of this document, the term “FM system” is used to refer to a system for facility management.

NOTE 2 For the purposes of this document, the term “organization” or “top management” will refer to the FM organization or FM top management unless otherwise stated.

3.1

organization

person or group of people that has its own functions with responsibilities, authorities and relationships to achieve its *objectives* (3.8)

Note 1 to entry: The concept of organization includes, but is not limited to sole-trader, company, corporation, firm, enterprise, authority, partnership, charity or institution, or part or combination thereof, whether incorporated or not, public or private.
