

Eurocode 2: Design of concrete structures
Part 2: Concrete bridges
Design and detailing rules
Estonian National Annex

Eurokoodeks 2: Betoonkonstruktsioonide
projekteerimine
Osa 2: Betoonsillad
Arvutus- ja konstrueerimisreeglid
Eesti standardi rahvuslik lisa

FOREWORD

This document:

- is the Estonian National Annex to the European Standard EN 1992-2:2005 “Eurocode 2: Design of concrete structures – Part 2: Concrete bridges – Design and detailing rules”. It includes Estonian Nationally Determined Parameters (NDP) and procedures and it must be used together with EN 1992-2:2005 for structural design of constructions built in Estonia;
- was ratified with order nr 187 of the Estonian Centre for Standardisation dated 09.10.2008;
- is endorsed with a notification published in the December 2008 issue of the official bulletin of the Estonian Centre for Standardisation.

The National annex of EVS-EN 1992-2 was prepared by Vello Otsmaa, Toomas Laur, Siim Iidnurm, Heiki Meos and Kaido Sooru in the Department of Structural Design of the Tallinn University of Technology. This document has been approved by Technical Committee EVS/TK 13 „Ehituskonstruksioonide projekteerimine“.

The proposition to prepare a national annex was made by EVS/TK 13, it was coordinated by the Estonian Centre for Standardisation and funded by the Ministry of Economic Affairs and Communications.

ICS 91.010.30 Technical aspects; 91.080.40 Concrete structures; 93.040 Bridge construction

CONTENTS

Annex NA (informative) National requirements for Estonia	4
NA.3.1.2 Strength.....	4
NA.3.1.6 Design compressive and tensile strengths.....	4
NA.3.2.4 Ductility characteristics	5
NA.4.2 Environmental conditions	5
NA.4.4.1.2 Minimum cover, c_{\min}	6
NA.5.1.3 Load cases and combinations	6
NA.5.2 Geometric imperfections.....	6
NA.5.3.2.2 Effective span of beams and slabs	6
NA.5.5 Linear elastic analysis with limited redistribution	7
NA.5.7 Non-linear analysis	7
NA.6.1 Bending with or without axial force	9
NA.6.2.2 Members not requiring design shear reinforcement	10
NA.6.2.3 Members requiring design shear reinforcement.....	11
NA.6.8.1 Verification conditions	14
NA.6.8.7 Verification of concrete under compression or shear	15
NA.7.2 Stresses	16
NA.7.3.1 General considerations.....	16
NA.7.3.3 Control of cracking without direct calculation	17
NA.7.3.4 Calculation of crack widths	17
NA.8.9.1 General.....	17
NA.8.10.4 Anchorages and couplers for prestressing tendons	18
NA.9.1 General.....	18
NA.9.2.2 Shear reinforcement.....	19
NA.9.5.3 Transverse reinforcement	19
NA.9.7 Deep beams.....	19
NA.9.8.1 Pile caps	19
NA.11.9 Detailing of members and particular rules.....	19
NA.113.2 Actions during execution	20
NA.113.3.2 Serviceability limit states.....	20
