This European Standard was approved on 1993-07-29. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

### Foreword

This European Standard was prepared by Working Group CLC/TC CECC/WG 3.

It is based, wherever possible, on the Publications of the International Electrotechnical Commission, and in particular on IEC 418, Variable capacitors.

The text of the draft based on document CECC(Secretariat)3098 was submitted to the formal vote; together with the voting report, circulated as document CECC(Secretariat)3379, it was approved as EN 134102 on 1993-07-29.

The following dates were fixed:

- latest date by which the EN has to be implemented  
at national level by publication of an identical  
national standard or by endorsement (dop) 1995-11-30
  - latest date by which the national standards conflicting  
with the EN have to be withdrawn (dow) 2003-11-30
- 

This document is a preview generated by EVS

## IDENTIFICATION OF THE DETAIL SPECIFICATION AND THE COMPONENT

The first page of the detail specification should have the layout recommended on the next page of this blank detail specification. The numbers in square brackets correspond to the following information which shall be inserted at the position indicated:

- [1] The name of the National Standards Organization under whose authority the detail specification is published and, if applicable, the organization from whom the detail specification is available
  - [2] The CECC symbol and number allotted to the detail specification by the CECC General Secretariat
  - [3] The number and issue number of the CECC generic and sectional specification as relevant; also national reference if different
  - [4] If different from the CECC number, the national number of the detail specification, date of issue and any further information required by the national system, together with any amendment numbers
  - [5] A brief description of the component or range of components
  - [6] Information on typical construction, when applicable
- For [5] and [6] the text to be given in the detail specification should be suitable for an entry in CECC 00 200 (Register of Approvals) and CECC 00 300 (Library List).
- [7] An outline drawing with main dimensions which are of importance for interchangeability and/or reference to the appropriate national or international document for outlines. Alternatively the drawing may be given in an annex to the detail specification but [7] should always contain an illustration of the general outer appearance of the component
  - [8] The level(s) of quality assessment covered by the detail specification
  - [9] Reference data giving information on the most important properties of the component which allow comparison between the various component types intended for the same, or for similar, applications.
