## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 22715 was prepared by Technical Committee ISO/TC 217, *Cosmetics*.

# Cosmetics — Packaging and labelling

## 1 Scope

This International Standard specifies requirements for packaging and labelling of all cosmetic products as defined according to national regulations or practices intended for sale or free distribution.

National regulations can, on several points, be more strict than this International Standard.

This International Standard is intended for use on cosmetics.

NOTE For packaging and labelling of toothpastes and oral rinses, see also ISO 11609<sup>[5]</sup> and ISO 16408<sup>[6]</sup>.

## 2 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

### 2.1

#### **primary packaging**

packaging designed to come into direct contact with the contents

### 2.2

#### **secondary packaging**

packaging designed to contain one or more primary packages and including any protective materials, if present

NOTE For labelling purposes, the outermost packaging is considered to be the secondary packaging that holds or contains the package at the point of sale.

### 2.3

#### **pre-package**

packaging at the point of sale, containing similar or different products with similar or different functions

## 3 Packaging

The packaging shall be designed so that, under conditions specified by the manufacturer for storage, transport and handling, it protects against damage and deterioration and it does not adversely affect the product.
