## Textile machinery and accessories — Drop wires for mechanical and electrical warp stop motions

*Matériel pour l'industrie textile — Lamelles pour casse-chaînes mécaniques et électriques*

First edition — 1978-07-15

UDC 677.054.756

Ref. No. ISO 441-1978 (E)

**Descriptors** : textile machinery, drop wires, warp stop motions, dimensions, dimensional tolerances.

Price based on 5 pages

## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 441 was developed by Technical Committee ISO/TC 72, *Textile machinery and accessories*, and was circulated to the member bodies in February 1977.

It has been approved by the member bodies of the following countries :

Belgium	Kenya	Switzerland
Czechoslovakia	Mexico	Turkey
France	Netherlands	United Kingdom
Germany	Poland	U.S.S.R.
India	Romania	Yugoslavia
Italy	South Africa, Rep. of	
Japan	Spain	

No member body expressed disapproval of the document.

This International Standard cancels and replaces ISO Recommendation R 441-1965, of which it constitutes a technical revision.

# Textile machinery and accessories – Drop wires for mechanical and electrical warp stop motions

## 1 SCOPE

This International Standard specifies the principal dimensions and tolerances of drop wires for mechanical and electrical warp stop motions.

## 2 FIELD OF APPLICATION

This International Standard applies to closed-end and open-end drop wires of the following types :

- type M for mechanical warp stop motions
- type E for electrical warp stop motions
