

Macintosh

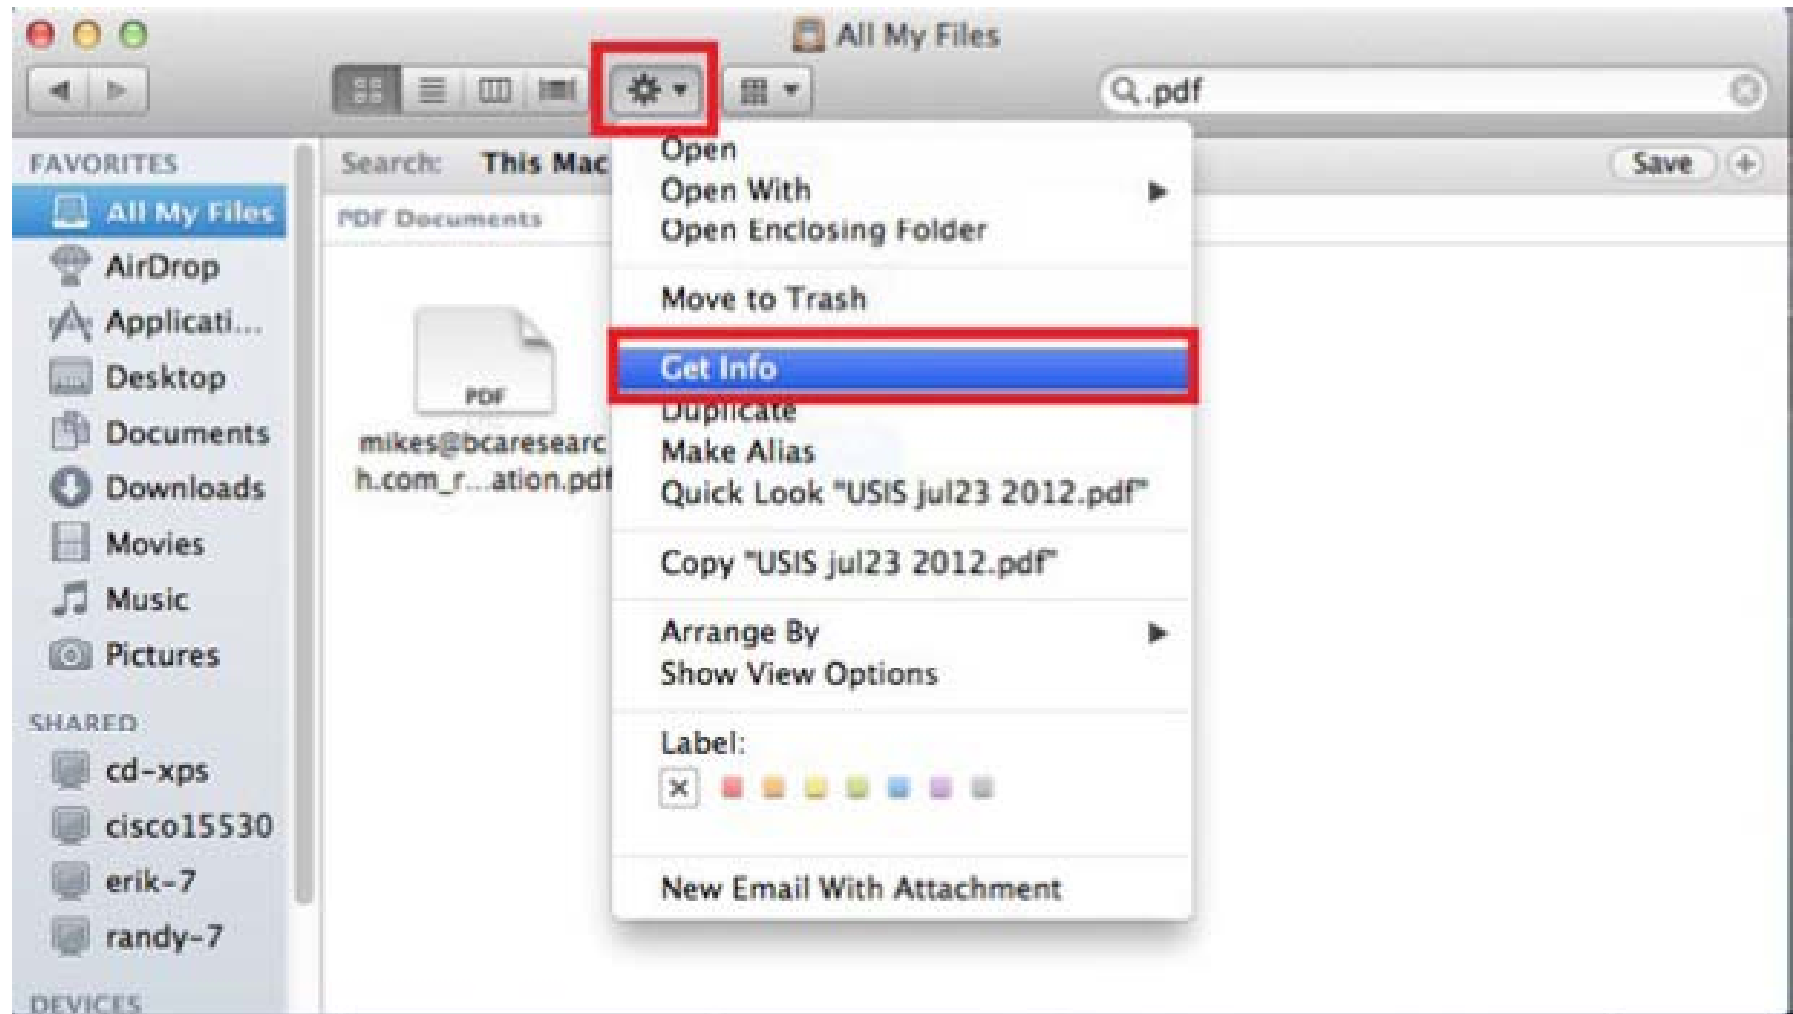

- Be sure to have Administrator grants on the computer on which you plan to use the standards.
- Install Adobe Reader version 10.5. or later
- Select Adobe Acrobat as the default viewer for pdf files. Follow these steps:
 1. Open the finder

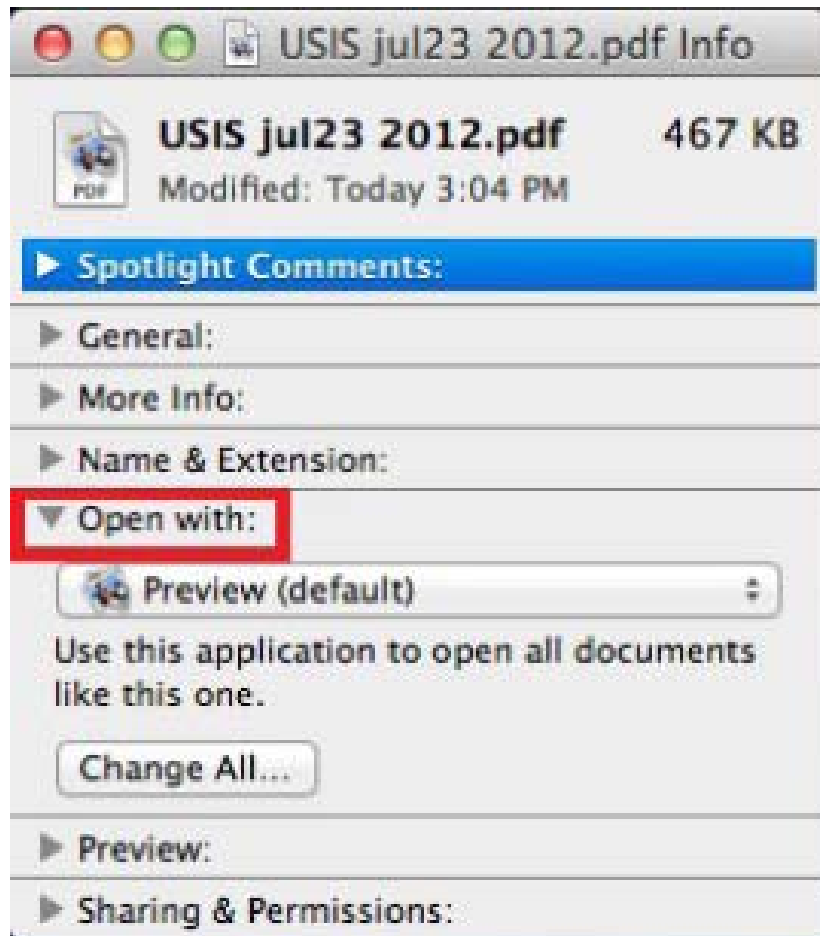

2. Enter `.pdf` in the search field (up and right in the finder panel). Select a pdf file among the result with a single mouse click.

3. Once the pdf is selected, click the small wheel and select "Get Info" in the popup menu.

4. Select the triangle left to the “Open with” label.

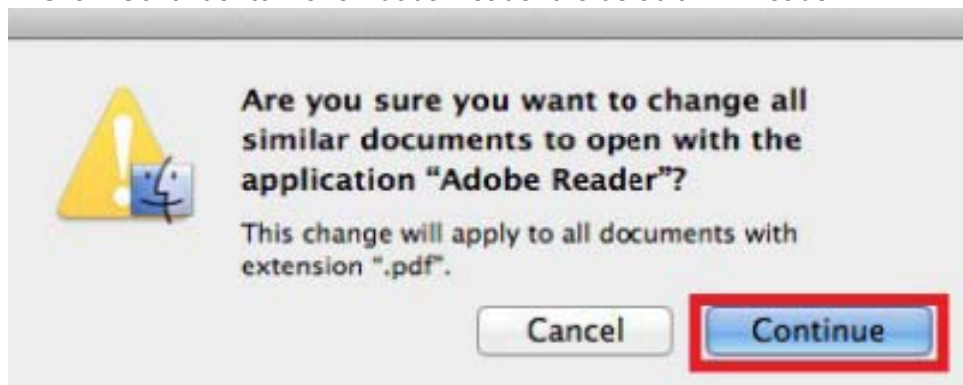

5. Click on Preview and select "Adobe Reader" in the menu. If the menu does not contain the item Adobe Reader , select "Other" and search Adobe Reader.

6. Select "Change All".

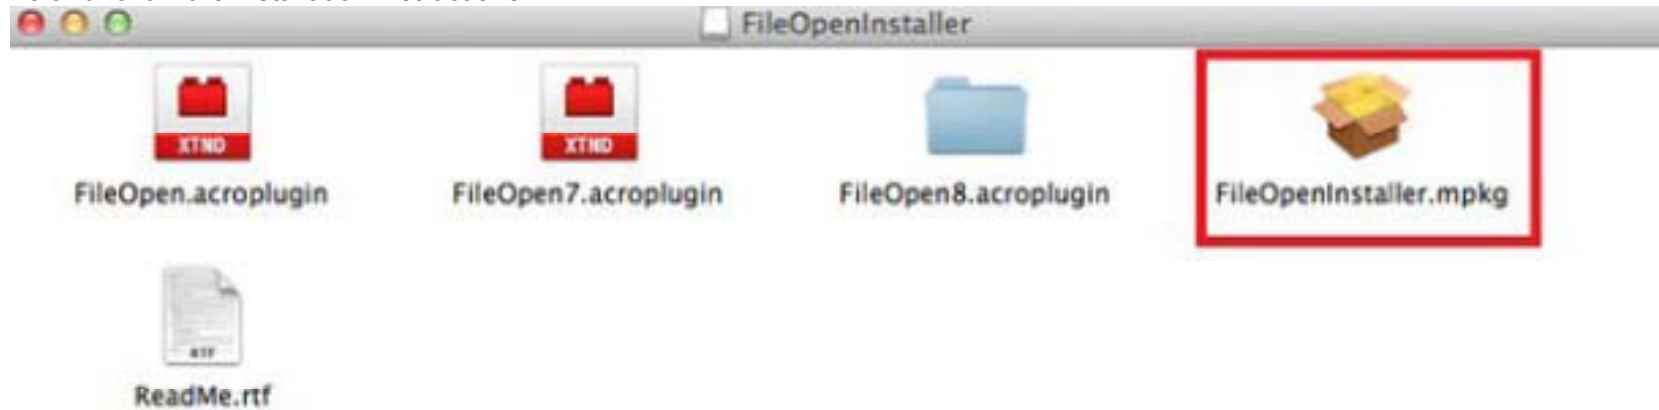

7. Click "Continue" to make Adobe Reader the default PDF reader.

Install the FileOpen Plug-In:

1. Download the latest version of the plug-in <http://plugin.fileopen.com>.
2. After downloading, open the FileOpenInstaller folder, launch the "FileOpenInstaller.mpkg" file and follow the installation instructions.

3. Open the document on web store.
4. If the document does not load correctly, restart the computer and try to open it again.
